Schwab Government Money Market Portfolio

Proxy Voting Policies, Procedures and Results

A description of the proxy voting policies and procedures used to determine how to vote proxies on behalf of the funds is available without charge, upon request, by visiting the Schwab Fund's website at www.schwabfunds.com/schwabfunds_prospectus, the SEC's website at www.sec.gov, or by contacting Schwab Funds at 1-877-824-5615.

Information regarding how a fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 is available, without charge, by visiting Schwab's website at www.schwabfunds.com/schwabfunds_prospectus or the SEC's website at www.sec.gov.

Investment Adviser: Charles Schwab Investment Management, Inc. (CSIM)

Portfolio Management

Linda Klingman, Vice President and Head of Money Market Strategies, leads the portfolio management team of Schwab's money market funds. Ms. Klingman also has overall responsibility for all aspects of the management of the fund. Prior to joining CSIM in 1990, Ms. Klingman was a senior money market trader with AIM Management. She has managed money market funds since 1988.

Lynn Paschen, Senior Portfolio Manager, is responsible for the day-to-day co-management of the fund. Prior to joining CSIM in 2011, Ms. Paschen held a number of positions at American Century Investments. She most recently was a portfolio manager and, from 2000 to 2003, worked as a fixed income trader. She has managed money market funds since 2003.

Nicole Perret-Gentil, Portfolio Manager, is responsible for the day-to-day co-management of the fund. Prior to joining CSIM in 2016, Ms. Perret-Gentil worked at Freddie Mac for 15 years, most recently as a Senior Portfolio Manager where she managed and executed trades for a fixed income strategy. Prior to that role, she served as a Portfolio Manager performing fixed income analysis, a Senior Research Analyst for investor and dealer relations, a Senior Securities Operations Analyst in loan and securities operations, and a Lead Mortgage Securities Operations Specialist. She also worked at Merrill Lynch for a year as a Senior Specialist in fixed income global banking and investments.

Schwab Government Money Market Portfolio

The Schwab Government Money Market Portfolio (the fund) seeks the highest current income consistent with stability of capital and liquidity. To pursue its goal, the fund invests in U.S. government securities such as U.S. Treasury bills and notes, other obligations that are issued by the U.S. government, its agencies or instrumentalities, repurchase agreements, and obligations that are issued by private issuers that are guaranteed as to principal or interest by the U.S. government, its agencies or instrumentalities. The fund will invest at least 99.5% of its total assets in cash, U.S. government securities and/or repurchase agreements that are collateralized fully by cash and/or U.S. government securities; under normal circumstances, investing at least 80% of the fund's net assets in U.S. government securities including repurchase agreements that are collateralized fully by U.S. government securities (excluding cash). For more information concerning the fund's investment objective, strategy, and risks, please see the fund's prospectus.

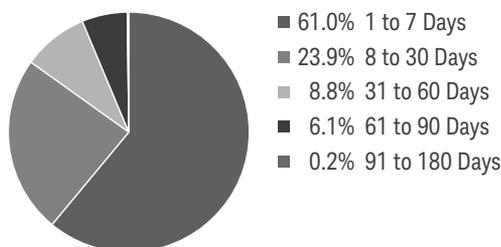

Market Highlights. Over the 12-month reporting period ended December 31, 2018, yields on taxable money market funds rose. Following three 0.25% rate hikes in 2017, the Federal Reserve (Fed) instituted four more during the reporting period—in March, June, September, and December—citing continued confidence in the U.S. labor market and the overall economy as well as inflation remaining in check. The federal funds rate ended the reporting period in a target range of 2.25% to 2.50%. Following its December meeting, however, the Fed signaled that it would take a more cautious approach to rate hikes going forward. Equity markets fell steeply in the last quarter of the reporting period—particularly in December—as investor anxiety rose on multiple fronts, including the direction of U.S. monetary policy, the slow progress of trade negotiations between China and the U.S., and the prospect of a global economic slowdown.

The U.S. bond yield curve flattened over most of the reporting period. Over the last two months of the reporting period, however, demand for longer-term Treasuries rose as investors sought safer havens, driving yields lower. The 10-year Treasury yield, which began the year at 2.40%, peaked at 3.24% in early November as stock indices hit record highs and ended the year at 2.69%.

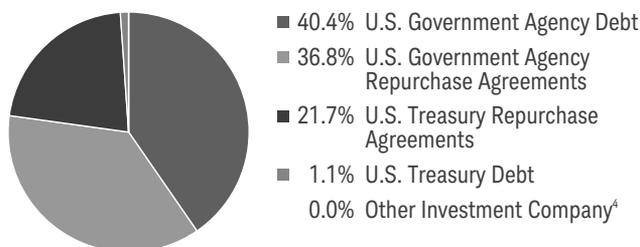

Outside the U.S., monetary policies remained mostly accommodative, although in some cases, given signs of rising inflation, central banks tightened their policies. The European Central Bank has held interest rates unchanged since March 2016 and in December 2018 reiterated that it would likely maintain those rates through next summer. The Bank of Japan upheld its short-term interest rate target of -0.1%, also unchanged since 2016. The Bank of England, however, raised its key official bank rate from 0.50% to 0.75% in August 2018, following a quarter-point increase in November 2017, despite ongoing uncertainties over the United Kingdom economy's wider direction and the impact of Brexit.

Performance, Positioning, and Strategies. Throughout the reporting period, the fund's investment adviser remained focused on seeking liquidity and stability of capital. All issuers in which the fund invests continue to undergo a rigorous credit review process and ongoing monitoring. In expectation of and response to the Fed's short-term interest rate increases, the fund's weighted average maturity (WAM) generally declined, beginning the reporting period at 21 days and ending at 13 days.

PORTFOLIO COMPOSITION BY EFFECTIVE MATURITY % OF INVESTMENTS¹

PORTFOLIO COMPOSITION BY SECURITY TYPE % OF INVESTMENTS³

STATISTICS

Weighted Average Maturity²

13

Management views and portfolio holdings may have changed since the report date.

¹ Maturity shown is the date the interest rate on those securities is reset, or the date those securities can be redeemed through demand.

² Money funds must maintain a dollar-weighted average maturity of no longer than 60 days and cannot invest in any security whose effective maturity is longer than 397 days (approximately 13 months).

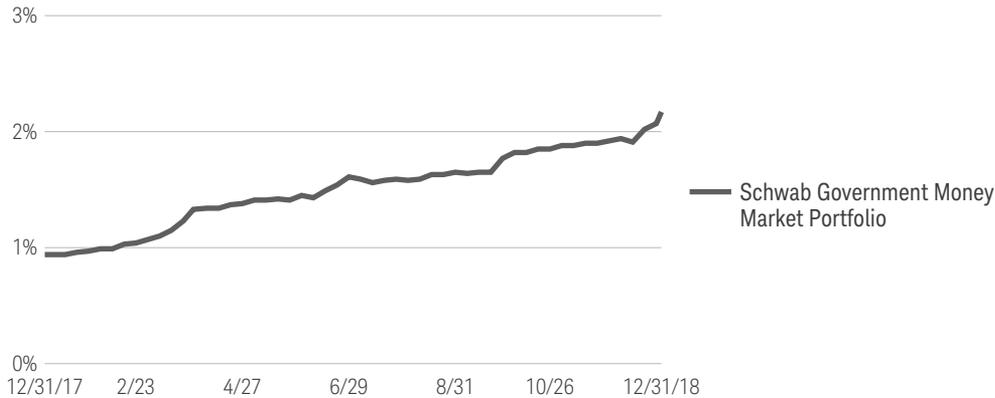

³ The percentage may differ from the Portfolio Holdings because the above calculation is based on a percentage of total investments, whereas the calculation in the Portfolio Holdings is based on a percentage of net assets.

⁴ Less than 0.05%

Performance and Fund Facts as of December 31, 2018

The performance data quoted represents past performance. Past performance does not guarantee future results. Current performance may be lower or higher than performance data quoted. To obtain more current performance information, please visit www.schwabfunds.com/schwabfunds_prospectus.

SEVEN-DAY AVERAGE YIELD TREND FOR PREVIOUS 12 MONTHS

SEVEN-DAY YIELDS¹

The seven-day yield is the income generated by the fund's holdings minus the fund's operating expenses. The seven-day yields are calculated using standard SEC formulas. The effective yield includes the effect of reinvesting daily dividends. Please remember that money market fund yields fluctuate.

	SCHWAB GOVERNMENT MONEY MARKET PORTFOLIO
TICKER SYMBOL	SWPXX
Seven-Day Yield (with waivers)²	2.17%
Seven-Day Yield (without waivers)²	2.08%
Seven-Day Effective Yield (with waivers)²	2.19%

You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

¹ Fund yields do not reflect the additional fees and expenses imposed by the insurance company under the variable insurance product contract. If those contract fees and expenses were included, the yields would be less than those shown. Please refer to the variable insurance product prospectus for a complete listing of these expenses.
² The Seven-Day Yield (with waivers) is the average income paid out over the previous seven days assuming interest income is not reinvested and it reflects the effect of any applicable waivers. Absent such waivers, the fund's yield would have been lower. The Seven-Day Yield (without waivers) is the yield without the effect of any applicable waivers. The Seven-Day Effective Yield is the yield with waivers assuming that all interest income is reinvested in additional shares of the fund. For additional details, see financial note 4.

Fund Expenses (Unaudited)

EXAMPLES FOR A \$1,000 INVESTMENT

As a fund shareholder, you may incur two types of costs: (1) transaction costs; and (2) ongoing costs, including management fees, transfer agent fees, and other fund expenses.

The expense examples below are intended to help you understand your ongoing cost (in dollars) of investing in the fund and to compare this cost with the ongoing cost of investing in other mutual funds. These examples are based on an investment of \$1,000 invested for six months beginning July 1, 2018 and held through December 31, 2018.

The Actual Return line in the table below provides information about actual account values and actual expenses. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period. To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value ÷ \$1,000 = 8.6), then multiply the result by the number given for the fund under the heading entitled "Expenses Paid During Period."

The Hypothetical Return line in the table below provides information about hypothetical account values and hypothetical expenses based on the fund's actual expense ratio and an assumed return of 5% per year before expenses. Because the return used is not an actual return, it may not be used to estimate the actual ending account value or expenses you paid for the period.

You may use this information to compare the ongoing costs of investing in the fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only, and do not reflect any transactional costs. Therefore, the hypothetical return lines of the table are useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	EXPENSE RATIO (ANNUALIZED) ¹	BEGINNING ACCOUNT VALUE AT 7/1/18	ENDING ACCOUNT VALUE (NET OF EXPENSES) AT 12/31/18	EXPENSES PAID DURING PERIOD 7/1/18-12/31/18 ²
Schwab Government Money Market Portfolio				
Actual Return	0.35%	\$1,000.00	\$1,008.90	\$1.77
Hypothetical 5% Return	0.35%	\$1,000.00	\$1,023.44	\$1.79

¹ Based on the most recent six-month expense ratio; may differ from the expense ratio provided in the Financial Highlights which covers a 12-month period.

² Expenses for the fund are equal to its annualized expense ratio, multiplied by the average account value over the period, multiplied by 184 days of the period, and divided by the 365 days of the fiscal year.

Financial Statements

FINANCIAL HIGHLIGHTS

	1/1/18– 12/31/18	1/1/17– 12/31/17	1/1/16– 12/31/16	1/1/15– 12/31/15	1/1/14– 12/31/14

Ratios/Supplemental Data					
Ratios to average net assets:					
Net operating expenses	0.35%	0.46% ⁴	0.37% ⁵	0.12% ⁵	0.07% ⁵
Gross operating expenses	0.48%	0.50%	0.49%	0.54%	0.49%
Net investment income (loss)	1.55%	0.44%	0.01%	0.01%	0.01%
Net assets, end of period (x 1,000,000)	\$138	\$95	\$106	\$116	\$117

¹ Calculated based on the average shares outstanding during the period.

² Per-share amount was less than \$0.005.

³ The per share amount does not accord with the change in aggregate gains and losses in securities during the period because of the timing of fund transactions in relation to fluctuating market values.

⁴ Effective October 3, 2017, the contractual expense limitation changed. The ratio presented for period ended December 31, 2017 is a blended ratio.

⁵ Reflects the effect of a voluntary yield waiver in excess of the contractual expense limitation.

Portfolio Holdings

as of December 31, 2018

This section shows all the securities in the fund's portfolio and their values as of the report date.

The fund files its complete schedule of portfolio holdings with the U.S. Securities and Exchange Commission (SEC) for the first and third quarter of each fiscal year on Form N-Q. The fund's Form N-Q is available on the SEC's website at www.sec.gov. The fund also files a complete schedule of portfolio holdings with the SEC monthly on Form N-MFP which is available immediately upon filing. The fund also makes available its complete schedule of portfolio holdings 5 business days after month end on the fund's website at www.schwabfunds.com/schwabfunds_prospectus along with a link to the fund's Form N-MFP filings on the SEC's website.

For fixed-rate obligations and repurchase agreements, the rate shown is the coupon rate (the rate established when the obligation was issued) and if the coupon rate is not available, the effective yield at the time of purchase is shown. For variable-rate obligations, the rate shown is the interest rate as of the report date based on each security's rate reset date. The reference rate and spread used is shown parenthetically in the security description, if available; if not, the reference rate is described in a footnote. The date shown in the maturity date column below is either the date on which the principal amount must be paid or the date payment must be made pursuant to a demand feature. If the security's structure includes one of a number of maturity-shortening provisions set forth in Rule 2a-7, such as an interest rate reset, demand feature or put feature, the effective maturity date is also disclosed. If the effective maturity and maturity date are the same, the date will only appear in the maturity date column.

Total increase or decrease	+ 43,212,893	(10,594,099)
End of period²	\$138,275,378	\$95,062,485

* Transactions took place at \$1.00 per share; figures for share quantities are the same as for dollars.

¹ For the period ended December 31, 2017, the fund distributed to shareholders \$450,116 from net investment income. The SEC eliminated the requirement to disclose distributions to shareholders from net investment income and from net realized gains in 2018 (see financial note 7 for additional information).

² End of period - Net assets include net investment income not yet distributed of \$2,564 at December 31, 2017. The SEC eliminated the requirement to disclose undistributed net investment income in 2018.

Financial Notes

1. Business Structure of the Fund:

Schwab Government Money Market Portfolio (the fund) is a series of Schwab Annuity Portfolios (the trust), a no-load, open-end management investment company. The trust is organized as a Massachusetts business trust and is registered under the Investment Company Act of 1940, as amended (the 1940 Act). The list below shows all the funds in the trust as of the end of the period, including the fund discussed in this report, which is highlighted:

SCHWAB ANNUITY PORTFOLIOS (ORGANIZED JANUARY 21, 1994)

Schwab Government Money Market Portfolio

Schwab S&P 500 Index Portfolio

Schwab VIT Balanced Portfolio

Schwab VIT Balanced with Growth Portfolio

Schwab VIT Growth Portfolio

The fund in this report offers one share class. Shares are bought and sold at closing net asset value per share (NAV), which is the price for all outstanding shares of a fund. Each share has a par value of 1/1,000 of a cent, and the fund's Board of Trustees (the Board) may authorize the issuance of as many shares as necessary.

The fund is intended as an investment vehicle for variable annuity contracts and variable life insurance policies to be offered by separate accounts of participating life insurance companies and for pension and retirement plans qualified under the Internal Revenue Code of 1986, as amended. At December 31, 2018, 100% of the fund's shares were held through separate accounts of five insurance companies. Subscriptions and redemptions of these insurance separate accounts could have a material impact on the fund.

The fund maintains its own account for purposes of holding assets and accounting, and is considered a separate entity for tax purposes. Within its account, the fund may also keep certain assets in segregated accounts, as required by securities law.

2. Significant Accounting Policies:

The following is a summary of the significant accounting policies the fund uses in its preparation of financial statements. The fund follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standard Codification *Topic 946 Financial Services – Investment Companies*. The accounting policies are in conformity with accounting principles generally accepted in the United States of America (GAAP).

Effective November 5, 2018, the fund adopted U.S. Securities and Exchange Commission (SEC) Regulation S-X disclosure requirement changes. The adopted changes are reflected throughout this report.

(a) Security Valuation:

Under procedures approved by the Board, the investment adviser has formed a Pricing Committee to administer the pricing and valuation of portfolio securities and other assets and to ensure that prices used for internal purposes or provided by third parties reasonably reflect fair market value. Among other things, these procedures allow the fund to utilize independent pricing services, quotations from securities and financial instrument dealers and other market sources to determine fair value.

Securities in the fund are valued at amortized cost (which approximates market value) as permitted in accordance with Rule 2a-7 of the 1940 Act. In the event that security valuations do not approximate market value, securities may be fair valued as determined in accordance with procedures adopted by the Board. The Pricing Committee considers a number of factors, including unobservable market inputs when arriving at fair value. The Pricing Committee may employ techniques such as the review of related or comparable assets or liabilities, related market activities, recent transactions, market multiples, book values, transactional back-testing, disposition analysis and other relevant information. The Pricing Committee regularly reviews these inputs and assumptions to calibrate the valuations. Due to the subjective and variable nature of fair value pricing, there can be no assurance that a fund could obtain the fair value assigned to the security upon the sale of such security. The Board convenes on a regular basis to review fair value determinations made by the fund pursuant to the valuation procedures.

In accordance with the authoritative guidance on fair value measurements and disclosures under GAAP, the fund discloses the fair value of its investments in a hierarchy that prioritizes the significant inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to valuations based upon unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to valuations based upon unobservable inputs that are significant to the valuation (Level 3 measurements). If inputs used to measure the financial instruments fall within different levels of the hierarchy, the

Financial Notes (continued)

2. Significant Accounting Policies (continued):

categorization is based on the lowest level input that is significant to the valuation. If the fund determines that either the volume and/or level of activity for an asset or liability has significantly decreased (from normal conditions for that asset or liability) or price quotations or observable inputs are not associated with orderly transactions, increased analysis and management judgment will be required to estimate fair value.

- **Underlying funds:** Mutual funds are valued at their respective NAVs.

The three levels of the fair value hierarchy are as follows:

- Level 1 – quoted prices in active markets for identical securities – Investments whose values are based on quoted market prices in active markets, and whose values are therefore classified as Level 1 prices, include active listed equities. Investments in mutual funds are valued daily at their NAVs, which are classified as Level 1 prices, without consideration to the classification level of the specific investments held by an underlying fund.
- Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.) – Investments that trade in markets that are not considered to be active, but whose values are based on quoted market prices, dealer quotations or valuations provided by alternative pricing sources supported by observable inputs are classified as Level 2 prices. These generally include U.S. government and sovereign obligations, most government agency securities, investment-grade corporate bonds, certain mortgage products, less liquid listed equities, and state, municipal and provincial obligations. Securities held by stable NAV money funds operating under Rule 2a-7 of the 1940 Act are valued at amortized cost which approximates current market value and are considered to be valued using Level 2 inputs.
- Level 3 – significant unobservable inputs (including the fund's own assumptions in determining the fair value of investments) – Investments whose values are classified as Level 3 prices have significant unobservable inputs, as they may trade infrequently or not at all. When observable prices are not available for these securities, the fund uses one or more valuation techniques for which sufficient and reliable data is available. The inputs used by the fund in estimating the value of Level 3 prices may include the original transaction price, quoted prices for similar securities or assets in active markets, completed or pending third-party transactions in the underlying investment or comparable issuers, and changes in financial ratios or cash flows. Level 3 prices may also be adjusted to reflect illiquidity and/or non-transferability, with the amount of such discount estimated by the fund in the absence of market information. Assumptions used by the fund due to the lack of observable inputs may significantly impact the resulting fair value and therefore the fund's results of operations.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The levels associated with valuing the fund's investments as of December 31, 2018 are disclosed in the Portfolio Holdings.

(b) Accounting Policies for certain Portfolio Investments (if held):

Repurchase Agreements: In a repurchase agreement, a fund buys a security from another party (the counterparty), usually a financial institution, with the agreement that it be sold back in the future. Repurchase agreements subject a fund to counterparty risk, meaning that the fund could lose money if the other party fails to perform under the terms of the agreement. The fund mitigates this risk by ensuring that a fund's repurchase agreements are collateralized by cash and/or U.S. government securities. All collateral is held by the fund's custodian (or, with multi-party agreements, the agent's bank) and is monitored daily to ensure that its market value is at least equal to the repurchase price under the agreement. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed or limited and the value of the collateral may decline. Investments in repurchase agreements are also based on a review of the credit quality of the repurchase agreement counterparty.

As of December 31, 2018, the fund had investments in repurchase agreements with a gross value of \$80,977,817 as disclosed in the Portfolio Holdings and the Statement of Assets and Liabilities. The value of the related collateral disclosed in the Portfolio Holdings exceeded the value of the repurchase agreements at period end.

Delayed-Delivery Transactions: The fund may buy securities at a predetermined price or yield, with payment and delivery taking place after the customary settlement period for that type of security. The fund will assume the rights and risks of ownership at the time of purchase, including the risk of price and yield fluctuations. Typically, no interest will accrue to the fund until the security is delivered. The fund will earmark or segregate appropriate liquid assets to cover its delayed-delivery purchase obligations, if any.

(c) Security Transactions:

Security transactions are recorded as of the date the order to buy or sell the security is executed. Realized gains and losses from security transactions are based on the identified costs of the securities involved.

Financial Notes (continued)

2. Significant Accounting Policies (continued):

(d) Investment Income:

Interest income is recorded as it accrues. If the fund buys a debt security at a discount (less than face value) or a premium (more than face value), it amortizes premiums and accretes discounts from the purchase settlement date up to maturity. The fund then increases (in the case of discounts) or reduces (in the case of premiums) the income it records from the security. Certain securities may be callable (meaning that the issuer has the option to pay it off before its maturity date). The fund amortizes the premium and accretes the discount on each callable security to the security's maturity date, except when the purchase price is higher than the call price at the security's call date (in which case the premium is amortized to the call date).

(e) Expenses:

Expenses that are specific to the fund are charged directly to the fund. Expenses that are common to all funds within the trust generally are allocated among the funds in proportion to their average daily net assets.

(f) Distributions to Shareholders:

The fund declares distributions from net investment income, if any, every day it is open for business. These distributions are paid out to the insurance company separate accounts once a month. The fund makes distributions from net realized capital gains, if any, once a year.

(g) Custody Credit:

The fund has an arrangement with its custodian bank, State Street Bank and Trust Company (State Street), under which the fund may receive a credit for its uninvested cash balance to offset its custody fees and accounting fees. The credit amounts, if any, are disclosed in the Statement of Operations as a reduction to the fund's operating expenses.

(h) Accounting Estimates:

The accounting policies described in this report conform to GAAP. Notwithstanding this, shareholders should understand that in order to follow these principles, fund management has to make estimates and assumptions that affect the information reported in the financial statements. It's possible that once the results are known, they may turn out to be different from these estimates and these differences may be material.

(i) Federal Income Taxes:

The fund intends to meet federal income and excise tax requirements for regulated investment companies under subchapter M of the Internal Revenue Code, as amended. Accordingly, the fund distributes substantially all of its net investment income and net realized capital gains, if any, to the participating insurance company's (shareholders) separate accounts each year. As long as the fund meets the tax requirements, it is not required to pay federal income tax.

(j) Indemnification:

Under the fund's organizational documents, the officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the fund. In addition, in the normal course of business the fund enters into contracts with its vendors and others that provide general indemnifications. The fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the fund. However, based on experience, the fund expects the risk of loss attributable to these arrangements to be remote.

(k) Recent Accounting Standards:

In March 2017, the FASB issued Accounting Standards Update "Premium Amortization on Purchased Callable Debt Securities" which amends the amortization period for a callable debt security held at a premium from the maturity date to the earliest call date. The guidance is effective for annual periods beginning after December 15, 2018, and interim periods within those annual periods. At this time, management believes these changes will not have a material impact to the financial statements.

In August 2018, the FASB issued Accounting Standards Update "Fair Value Measurement (Topic 820)" (ASU 2018-13) which modifies the disclosure requirements for fair value measurement by removing, modifying, or adding certain disclosures. The amendments are effective for annual periods beginning after December 15, 2019, and interim periods within those annual periods. The fund is permitted to early adopt any removed or modified disclosures upon issuance of this update and delay adoption of the additional disclosures until their effective date. The fund has early adopted certain removed or modified disclosures, including the

Financial Notes (continued)

2. Significant Accounting Policies (continued):

amount of and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy and the policy for timing of transfers between levels upon issuance of ASU 2018-13, and has delayed adoption of the additional disclosures until their effective date. At this time, management is currently evaluating the impact that the adoption of the additional disclosures will have on the fund's financial statements.

3. Risk Factors:

Investment Risk. You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The fund's sponsor has no legal obligation to provide financial support to the fund, and you should not expect that the sponsor will provide financial support to the fund at any time.

Interest Rate Risk. Interest rates rise and fall over time. As with any investment whose yield reflects current interest rates, the fund's yield will change over time. During periods when interest rates are low, the fund's yield (and total return) also will be low or may even be negative, which may make it difficult for the fund to pay expenses out of fund assets or maintain a stable \$1.00 share price. A change in a central bank's monetary policy or improving economic conditions, among other things, may result in an increase in interest rates. The fund is currently subject to heightened levels of interest rate risk because of the continued economic recovery, along with the fact that the Federal Reserve Board ended its quantitative easing program in 2014, and has begun, and may continue, to raise interest rates. A sudden or unpredictable rise in interest rates may cause volatility in the market and may decrease liquidity in the money market securities markets, making it more difficult for the fund to sell its money market investments at a time when the investment adviser might wish to sell such investments. Decreased market liquidity also may make it more difficult to value some or all of the fund's money market securities holdings. In addition, to the extent the fund makes any reimbursement payments to the investment adviser and/or its affiliates, the fund's yield would be lower.

Stable Net Asset Value Risk. If the fund or another money market fund fails to maintain a stable net asset value (or such perception exists in the market place), the fund could experience increased redemptions, which may adversely impact the fund's share price. The fund is permitted, among other things, to reduce or withhold any income and/or gains generated by the fund to maintain a stable \$1.00 share price.

Repurchase Agreements Risk. When the fund enters into a repurchase agreement, the fund is exposed to the risk that the other party (i.e. the counterparty) will not fulfill its contractual obligation. In a repurchase agreement, there exists the risk that, when the fund buys a security from a counterparty that agrees to repurchase the security at an agreed upon price (usually higher) and time, the counterparty will not repurchase the security.

Credit Risk. The fund is subject to the risk that a decline in the credit quality of a fund investment could cause the fund to lose money or underperform. The fund could lose money if the issuer of a fund investment fails to make timely principal or interest payments or if a guarantor, liquidity provider or counterparty of a fund investment fails to honor its obligations. Even though the fund's investments in repurchase agreements are collateralized at all times, there is some risk to the fund if the other party should default on its obligations and the fund is delayed or prevented from recovering or disposing of the collateral. Negative perceptions of the ability of an issuer, guarantor, liquidity provider or counterparty to make payments or otherwise honor its obligations, as applicable, could also cause the price of that investment to decline. The credit quality of the fund's portfolio holdings can change rapidly in certain market environments and any downgrade or default on the part of a single fund investment could cause the fund's share price or yield to fall.

Many of the U.S. government securities that the fund invests in are not backed by the full faith and credit of the U.S. government, which means they are neither issued nor guaranteed by the U.S. Treasury. Although maintained in conservatorship by the Federal Housing Finance Agency since September 2008, the Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac) maintain only lines of credit with the U.S. Treasury. The Federal Home Loan Banks maintain limited access to credit lines from the U.S. Treasury. Other securities, such as obligations issued by the Federal Farm Credit Banks Funding Corporation, are supported solely by the credit of the issuer. There can be no assurance that the U.S. government will provide financial support to securities of its agencies and instrumentalities if it is not obligated to do so under law. Also, any government guarantees on securities a fund owns do not extend to the shares of the fund itself.

Financial Notes (continued)

3. Risk Factors (continued):

Management Risk. Any actively managed mutual fund is subject to the risk that its investment adviser will select investments or allocate assets in a manner that could cause the fund to underperform or otherwise not meet its objective. The fund's investment adviser applies its own investment techniques and risk analyses in making investment decisions for the fund, but there can be no guarantee that they will produce the desired results. The investment adviser's maturity decisions will also affect the fund's yield, and potentially could affect its share price. To the extent that the investment adviser anticipates interest rate trends imprecisely, the fund's yield at times could lag those of other money market funds.

Redemption Risk. The fund may experience periods of heavy redemptions that could cause the fund to liquidate its assets at inopportune times or at a loss or depressed value, particularly during periods of declining or illiquid markets. Redemptions by a few large investors in the fund may have a significant adverse effect on the fund's ability to maintain a stable \$1.00 share price. In the event any money market fund fails to maintain a stable net asset value, other money market funds, including the fund, could face a market-wide risk of increased redemption pressures, potentially jeopardizing the stability of their \$1.00 share prices.

Money Market Fund Risk. The fund is not designed to offer capital appreciation. In exchange for their emphasis on stability and liquidity, money market investments may offer lower long-term performance than stock or bond investments.

Tax Diversification Risk. As described above, the fund intends to operate as a government money market fund under the regulations governing money market funds. Additionally, the fund intends to meet the diversification requirements that are applicable to insurance company separate accounts under Subchapter L of the Internal Revenue Code of 1986, as amended (the Diversification Requirements). To satisfy the Diversification Requirements applicable to variable annuity contracts, the value of the assets of the fund invested in securities issued by the U.S. government, its agencies or instrumentalities must remain below specified thresholds. For these purposes, each U.S. government agency or instrumentality is treated as a separate issuer.

Operating as a government money market fund may make it difficult for the fund to meet the Diversification Requirements. This difficulty may be exacerbated by the potential increase in demand for the types of securities in which the fund invests as a result of changes to the rules that govern SEC registered money market funds. A failure to satisfy the Diversification Requirements could have significant adverse tax consequences for variable life insurance and variable annuity contract owners whose contract values are determined by investment in the fund.

Please refer to the fund's prospectus for a more complete description of the principal risks of investing in the fund.

4. Affiliates and Affiliated Transactions:

Investment Adviser

Charles Schwab Investment Management, Inc. (CSIM or the investment adviser), a wholly owned subsidiary of The Charles Schwab Corporation, serves as the fund's investment adviser and administrator pursuant to an Investment Advisory and Administration Agreement between CSIM and the trust.

For its advisory and administrative services to the fund, CSIM is entitled to receive an annual fee, payable monthly, based on a percentage of the fund's average daily net assets as follows:

AVERAGE DAILY NET ASSETS

First \$1 billion	0.35%
More than \$1 billion but not exceeding \$10 billion	0.32%
More than \$10 billion but not exceeding \$20 billion	0.30%
More than \$20 billion but not exceeding \$40 billion	0.27%
Over \$40 billion	0.25%

For the period ended December 31, 2018, the aggregate advisory fee paid to CSIM by the fund was 0.35%, as a percentage of the fund's average daily net assets.

Contractual Expense Limitation

CSIM and its affiliates have made an additional agreement with the fund, for so long as CSIM serves as the investment adviser to the fund, which may only be amended or terminated with the approval of the Board, to limit the total annual fund operating expenses charged, excluding interest, taxes, and certain non-routine expenses (expense limitation) to 0.35%.

Financial Notes (continued)

4. Affiliates and Affiliated Transactions (continued):

Interfund Borrowing and Lending

Pursuant to an exemptive order issued by the SEC, the fund may enter into interfund borrowing and lending transactions with other funds in the Fund Complex (for definition refer to Trustees and Officers section). All loans are for temporary or emergency purposes and the interest rate to be charged will be the average of the overnight repurchase agreement rate and the short-term bank loan rate. All loans are subject to numerous conditions designed to ensure fair and equitable treatment of all participating funds. The interfund lending facility is subject to the oversight and periodic review by the Board. The fund had no interfund borrowing or lending activity during the period.

5. Board of Trustees:

The Board may include people who are officers and/or directors of CSIM or its affiliates. Federal securities law limits the percentage of such “interested persons” who may serve on a trust’s board, and the trust was in compliance with these limitations throughout the report period. The trust did not pay any of these interested persons for their services as trustees, but it did pay non-interested persons (independent trustees), as noted on the fund’s Statement of Operations. For information regarding the trustees, please refer to the Trustees and Officers table at the end of this report.

6. Borrowing from Banks:

During the period, the fund was a participant with other U.S. registered investment companies managed by CSIM in a joint, syndicated, committed \$605 million line of credit (the Syndicated Credit Facility), which matured on October 4, 2018. On October 4, 2018, the Syndicated Credit Facility was amended to run for a new 364 day period with an increased line of \$750 million, maturing on October 3, 2019. Under the terms of the Syndicated Credit Facility, in addition to the interest charged on any borrowings by a fund, the fund paid a commitment fee of 0.15% per annum on its proportionate share of the unused portion of the Syndicated Credit Facility.

During the period, the fund was a participant with other U.S. registered investment companies managed by CSIM in a joint, unsecured, uncommitted \$500 million line of credit (the Uncommitted Credit Facility), with State Street, which matured on November 30, 2018. On November 30, 2018 the Uncommitted Credit Facility was amended to run for a new 364 day period, maturing on November 29, 2019. Under the terms of the Uncommitted Credit Facility, the fund pays interest on the amount it borrows. There were no borrowings from either line of credit during the period.

The fund also has access to custodian overdraft facilities. The fund may have utilized the overdraft facility and incurred an interest expense, which is disclosed on the fund’s Statement of Operations, if any. The interest expense is determined based on a negotiated rate above the current Federal Funds Rate.

7. Federal Income Taxes:

At December 31, 2018, the tax basis cost of the fund’s investments was \$138,403,867 and the unrealized appreciation and depreciation were \$45,600 and (\$0), respectively, with a net unrealized appreciation of \$45,600.

As of December 31, 2018, the components of distributable earnings on a tax basis were as follows:

Undistributed ordinary income	\$2,564
Net unrealized appreciation (depreciation) on investments	<u>45,600</u>
Total	<u>\$48,164</u>

Capital loss carryforwards may be used to offset future realized capital gains for federal income tax purposes. As of December 31, 2018, the fund had capital loss carryforwards of \$14 with no expiration.

Financial Notes (continued)

7. Federal Income Taxes (continued):

The tax basis components of distributions paid during the current and prior fiscal years were as follows:

Current period distributions

Ordinary income	\$1,688,592
Long-term capital gains	–

Prior period distributions

Ordinary income	\$449,060
Long-term capital gains	1,056

Distributions paid to shareholders are based on net investment income and net realized gains determined on a tax basis, which may differ from net investment income and net realized gains for financial reporting purposes. These differences reflect the differing character of certain income items and net realized gains and losses for financial statement and tax purposes, and may result in reclassification among certain capital accounts on the financial statements. The fund may also designate a portion of the amount paid to redeeming shareholders as a distribution for tax purposes.

Permanent book and tax basis differences may result in reclassifications between components of net assets as required. The adjustments will have no impact on net assets or the results of operations.

As of December 31, 2018, management has reviewed the tax positions for open periods (for federal purposes, three years from the date of filing and for state purposes, four years from the date of filing) as applicable to the fund, and has determined that no provision for income tax is required in the fund's financial statements. The fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the period ended December 31, 2018, the fund did not incur any interest or penalties.

8. Subsequent Events:

Management has determined there are no subsequent events or transactions through the date the financial statements were issued that would have materially impacted the financial statements as presented.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of Schwab Annuity Portfolios and Shareholders of Schwab Government Money Market Portfolio

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the portfolio holdings, of Schwab Government Money Market Portfolio (one of the funds constituting Schwab Annuity Portfolios, hereafter referred to as the “Fund”) as of December 31, 2018, the related statement of operations for the year ended December 31, 2018, the statement of changes in net assets for each of the two years in the period ended December 31, 2018, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2018 (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2018, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2018 and the financial highlights for each of the five years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodian and brokers. We believe that our audits provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP

San Francisco, California

February 19, 2019

We have served as the auditor of one or more investment companies in the Schwab Funds Complex since 1989.

Trustees and Officers

The tables below give information about the trustees and officers of Schwab Annuity Portfolios, which includes the fund covered in this report. ¹ Each Trustee shall hold office until the election and qualification of his or her successor, or until he or she dies, resigns or is removed. The retirement policy requires that each independent trustee retire by December 31 of the year in which the Trustee turns 74 or the Trustee's twentieth year of service as an independent trustee on any trust in the Fund Complex, whichever occurs first.

² Mr. Bettinger, Ms. Chandoha and Mr. Martinetto are Interested Trustees. Mr. Bettinger is an Interested Trustee because he owns stock of The Charles Schwab Corporation (CSC), the parent company of Charles Schwab Investment Management, Inc. (CSIM), the investment adviser for the trusts in the Fund Complex, is an employee and director of Charles Schwab & Co., Inc. (CS&Co), the principal underwriter for The Charles Schwab Family of Funds, Schwab Investments, Schwab Capital Trust and Schwab Annuity Portfolios, and is a director of CSIM. Ms. Chandoha is an Interested Trustee because she owns stock of CSC and is an employee and director of CSIM. Mr. Martinetto is an Interested Trustee because he owns stock of CSC and is an employee and director of CS&Co.

³ The President, Treasurer and Secretary/Clerk hold office until their respective successors are chosen and qualified or until he or she sooner dies, resigns, is removed or becomes disqualified. Each of the other officers serves at the pleasure of the Board.

Notes
