GOLDMAN SACHS VARIABLE INSURANCE TRUST

- Goldman Sachs
- Global Trends Allocation Fund

Beginning on or after January 1, 2021, you may not receive paper copies of the Fund's annual and semi-annual shareholder reports from the insurance company that offers your variable insurance contract or your financial intermediary, unless you specifically request paper copies of the reports from the insurance company or from your financial intermediary. Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. At any time, you may elect to receive reports and certain communications from the insurance company electronically by contacting your insurance company or your financial intermediary.

You may elect to receive all future shareholder reports in paper free of charge. You can inform the insurance company or your financial intermediary that you wish to receive paper copies of reports. Your election to receive reports in paper will apply to all Goldman Sachs Funds available under your contract and may apply to all funds held with your financial intermediary.

Shares of the Trust are offered to separate accounts of participating life insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Shares of the Trust are not offered directly to the general public.

THE SECURITIES AND EXCHANGE COMMISSION AND THE COMMODITY FUTURES TRADING COMMISSION HAVE NOT APPROVED OR DISAPPROVED THESE SECURITIES OR PASSED UPON THE ADEQUACY OF THIS PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

AN INVESTMENT IN THE FUND IS NOT A BANK DEPOSIT AND IS NOT INSURED BY THE FEDERAL DEPOSIT INSURANCE CORPORATION OR ANY OTHER GOVERNMENT AGENCY. AN INVESTMENT IN THE FUND INVOLVES INVESTMENT RISKS, AND YOU MAY LOSE MONEY IN THE FUND.

Asset Management

Goldman Sachs Global Trends Allocation Fund—Summary

INVESTMENT OBJECTIVE

The Goldman Sachs Global Trends Allocation Fund (the “Fund”) seeks total return while seeking to provide volatility management.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell Institutional Shares of the Fund. This table does not reflect the fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option. Had those fees and expenses been included, overall fees and expenses would be higher.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Institutional
Management Fees	0.79%
Distribution and Service (12b-1) Fees	None
Other Expenses	0.11%
Acquired Fund Fees and Expenses	0.11%
Total Annual Fund Operating Expenses¹	1.01%
Fee Waiver and Expense Limitation ²	(0.30)%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Limitation	0.71%

¹ The “Total Annual Fund Operating Expenses” do not correlate to the ratios of net and total expenses to average net assets provided in the Financial Highlights, which reflect the operating expenses of the Fund and do not include “Acquired Fund Fees and Expenses.”

² The Investment Adviser has agreed to (i) waive a portion of the management fee in order to achieve an effective net management fee rate of 0.67% of the Fund’s average daily net assets and; (ii) waive a portion of its management fee payable by the Fund in an amount equal to any management fees it earns as an investment adviser to any affiliated funds in which the Fund invests, except those management fees it earns from the Fund’s investments of cash collateral received in connection with securities lending transactions in affiliated funds; and (iii) reduce or limit “Other Expenses” (excluding acquired fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.004% of the Fund’s average daily net assets. These arrangements will remain in effect through at least April 30, 2022, and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. This Example does not reflect the fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option. Had those fees and expenses been included, the costs shown below would be higher. The Example assumes that you invest \$10,000 in Institutional Shares of the Fund for the time periods indicated and then redeem all of your Institutional Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Institutional Shares	\$73	\$292	\$529	\$1,209

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (i.e., “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund’s performance. The Fund’s portfolio turnover rate for the fiscal year ended December 31, 2020 was 168% of the average value of its portfolio.

PRINCIPAL STRATEGY

The Fund primarily seeks to achieve its investment objective by investing in a global portfolio of equity and fixed income asset classes. The Fund may invest in one or a combination of the following securities and instruments: pooled investment vehicles, including exchange-traded funds (“ETFs”) and other investment companies; equity securities and fixed income securities of U.S. and non-U.S. issuers; and derivatives that provide exposure to a broad spectrum of asset classes and geographic regions. Under normal market conditions, the Fund expects to invest at least 40% of its assets in equity investments and at least 20% of its assets in fixed income investments. The Investment Adviser makes investment decisions based upon its analysis of market factors around the world, and may allocate more of the Fund’s assets to investments with strong recent performance and allocate assets away from investments with poor recent performance. The percentage of the Fund’s portfolio exposed to any asset class or geographic region will vary from time to time as the weightings of the Fund change, and the Fund may not be invested in each asset class at all times. The Fund intends to have investments economically tied to at least three countries, including the United States, under normal market conditions. At times the Fund may be heavily invested in certain asset classes or geographic regions, depending on the asset allocation of the strategy. The Fund may invest without restriction as to issuer capitalization, currency, maturity or credit rating.

As part of the Fund’s investment strategy, the Investment Adviser seeks to manage volatility and limit losses by allocating the Fund’s assets away from risky investments in distressed or volatile market environments. Volatility is a statistical measurement of the magnitude of up and down fluctuations in the value of a financial instrument or index. In distressed or volatile market environments, the Fund may also hold significant amounts of U.S. Treasury, short-term, or other fixed income investments, including money market funds and repurchase agreements or cash, and at times may invest up to 100% of its assets in such investments. While the Investment Adviser attempts to manage the Fund’s volatility, there can be no guarantee that the Fund will be successful.

The Fund’s investments in derivatives may include: (i) futures contracts, including futures based on securities and/or indices; (ii) swaps, including interest rate, total return, variance, and/or index swaps, and swaps on futures contracts; (iii) options, including long and short positions in call options and put options on indices, or currencies, swaptions and options on futures contracts; and (iv) structured notes. The Fund may engage in forward foreign currency transactions for both investment and hedging purposes.

The Quantitative Investment Strategies (“QIS”) team uses a systematic, rules-based approach, in combination with a qualitative overlay, to select the stocks in which the Fund invests. The Fund may make investment decisions that deviate from those generated by the QIS team’s proprietary models, at the discretion of the Investment Adviser.

The Fund’s blended benchmark is a composite of 60% Morgan Stanley Capital International (MSCI) World Index (Net, USD, Hedged) / 40% Bloomberg Barclays U.S. Treasury Index (Total Return, USD, Unhedged) (the “60% MSCI World / 40% Bloomberg Barclays U.S. Treasury Index” or “Composite Index”), as discussed further under “Performance.”

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund’s principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Absence of Regulation Risk. The Fund engages in over-the-counter (“OTC”) transactions, which trade in a dealer network, rather than on an exchange. In general, there is less governmental regulation and supervision of transactions in the OTC markets than of transactions entered into on organized exchanges.

Credit/Default Risk. An issuer or guarantor of fixed income securities or instruments held by the Fund (which may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation. Additionally, the credit quality of securities may deteriorate rapidly, which may impair the Fund’s liquidity and cause significant deterioration in net asset value (“NAV”). To the extent that the Fund invests in non-investment grade fixed income securities, these risks may be more pronounced.

Derivatives Risk. The Fund’s use of options, forwards, interest rate futures, interest rate swaps, credit default swaps and other derivative instruments may result in losses. These instruments, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other instruments, may be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments.

Expenses Risk. By investing in pooled investment vehicles (including investment companies and ETFs), partnerships and real estate investment trusts (“REITs”) indirectly through the Fund, the investor will incur not only a proportionate share of the expenses of the pooled investment vehicles, partnerships and REITs held by the Fund (including operating costs and investment management fees), but also the expenses of the Fund.

Foreign and Emerging Countries Risk. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The imposition of exchange controls (including repatriation restrictions), sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or from problems in share registration, settlement or custody, may also result in losses. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. These risks may be more pronounced in connection with the Fund's investments in securities of issuers located in, or otherwise economically tied to, emerging countries.

Geographic Risk. If the Fund focuses its investments in issuers located in a particular country or geographic region, it will subject the Fund, to a greater extent than if investments were less focused, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that country or region, such as: adverse securities markets; adverse exchange rates; adverse social, political, regulatory, economic, business, environmental or other developments; or natural disasters.

Interest Rate Risk. When interest rates increase, fixed income securities or instruments held by the Fund will generally decline in value. Long-term fixed income securities will normally have more price volatility because of this risk than short-term fixed income securities or instruments. The risks associated with changing interest rates may have unpredictable effects on the markets and the Fund's investments. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Fund.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Leverage Risk. Borrowing and the use of derivatives may result in leverage and may make the Fund more volatile. The use of leverage may cause the Fund to liquidate portfolio positions to satisfy its obligations or to meet asset segregation requirements when it may not be advantageous to do so. The use of leverage by the Fund can substantially increase the adverse impact to which the Fund's investment portfolio may be subject.

Liquidity Risk. The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, an unusually high volume of redemption requests or other reasons. To meet redemption requests, the Fund may be forced to sell securities, at an unfavorable time and/or under unfavorable conditions. Liquidity risk may be the result of, among other things, the reduced number and capacity of traditional market participants to make a market in fixed income securities or the lack of an active market. The potential for liquidity risk may be magnified by a rising interest rate environment or other circumstances where investor redemptions from fixed income funds may be higher than normal, potentially causing increased supply in the market due to selling activity. These risks may be more pronounced in connection with the Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on the Fund's liquidity.

Management Risk. A strategy used by the Investment Adviser may fail to produce the intended results.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, acts of terrorism, social unrest, natural disasters, the spread of infectious illness or other public health threats could also significantly impact the Fund and its investments.

Mid-Cap and Small-Cap Risk. Investments in mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

NAV Risk. The net asset value ("NAV") of the Fund and the value of your investment may fluctuate.

Pooled Investments Risk. By investing in pooled investment vehicles (including investment companies and ETFs), partnerships and REITs indirectly through the Fund, investors will incur a proportionate share of the expenses of the other pooled investment vehicles, partnerships and REITs held by the Fund (including operating costs and investment management fees), in addition to the fees and expenses regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investments in direct proportion to the amount of assets the Fund invests therein.

Portfolio Turnover Rate Risk. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which must be borne by the Fund and its shareholders.

Sovereign Default Risk. An issuer of non-U.S. sovereign debt, such as Germany or Japan, or the governmental authorities that control the repayment of the debt, may be unable or unwilling to repay the principal or interest when due. This may result from political or social factors, the general economic environment of a country, levels of foreign debt or foreign currency exchange rates.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Swaps Risk. In a standard “swap” transaction, two parties agree to exchange the returns, differentials in rates of return or some other amount earned or realized on the “notional amount” of predetermined investments or instruments, which may be adjusted for an interest factor. Swaps can involve greater risks than direct investment in securities, because swaps may be leveraged and subject to counterparty risk (e.g., the risk of a counterparty’s defaulting on the obligation or bankruptcy), credit risk and pricing risk (i.e., swaps may be difficult to value). Swaps may also be considered illiquid. It may not be possible for the Fund to liquidate a swap position at an advantageous time or price, which may result in significant losses.

U.S. Government Securities Risk. The U.S. government may not provide financial support to U.S. government agencies, instrumentalities or sponsored enterprises if it is not obligated to do so by law. U.S. Government Securities issued by those agencies, instrumentalities and government sponsored enterprises, including those issued by the Federal National Mortgage Association (“Fannie Mae”), Federal Home Loan Mortgage Corporation (“Freddie Mac”) and the Federal Home Loan Banks, are neither issued nor guaranteed by the U.S. Treasury and, therefore, are not backed by the full faith and credit of the United States. The maximum potential liability of the issuers of some U.S. Government Securities held by the Fund may greatly exceed their current resources, including any legal right to support from the U.S. Treasury. It is possible that issuers of U.S. Government Securities will not have the funds to meet their payment obligations in the future.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund’s Institutional Shares from year to year; and (b) how the average annual total returns of the Fund’s Institutional Shares compare to those of certain broad-based securities market indices and to the 60% MSCI World / 40% Bloomberg Barclays U.S. Treasury Index, a composite representation prepared by the Investment Adviser of the performance of the Fund’s asset classes weighted according to their respective weightings in the Fund’s target range. The Composite Index is comprised of the Morgan Stanley Capital International (MSCI) World Index (Net, USD, Hedged) (60%) and the Bloomberg Barclays U.S. Treasury Index (Total Return, USD, Unhedged) (40%). Through April 30, 2015, the Fund had been known as the Goldman Sachs Global Markets Navigator Fund, and its investment objective and certain of its strategies differed. Performance information prior to this date reflects the Fund’s former investment objective and strategies. The Fund’s past performance is not necessarily an indication of how the Fund will perform in the future. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown. In addition, performance reflects Fund level expenses but does not reflect the fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option for any contract or policy. Had performance reflected all of those fees and expenses, performance would have been reduced.

Updated performance information is available at no cost at www.gsamfunds.com/vit or by calling the phone number on the back cover of the Prospectus.

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	7.41%	December 31, 2020
Worst Quarter Return	-7.49%	December 31, 2018

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2020	1 Year	5 Years	Since Inception
Institutional Shares (Inception 10/16/2013)	4.35%	5.89%	4.28%
60% MSCI World / 40% Bloomberg Barclays U.S. Treasury Index	12.65%	9.15%	8.15%
MSCI World Index (Net, USD, Hedged) (reflects no deduction for fees or expenses)	14.23%	12.29%	11.00%
Bloomberg Barclays U.S. Treasury Index (Total Return, USD, Unhedged) (reflects no deduction for fees or expenses)	7.98%	3.77%	3.32%

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the “Investment Adviser” or “GSAM”).

Portfolio Managers: Federico Gilly, Managing Director, has managed the Fund since 2018; and Oliver Bunn, Vice President, has managed the Fund since 2018.

BUYING AND SELLING FUND SHARES

Fund shares are not sold directly to the public. Fund shares may be purchased and redeemed by separate accounts that fund variable annuity and variable life insurance contracts issued by participating insurance companies. Orders received from separate accounts to purchase or redeem Fund shares are effected on business days. Individual investors may purchase or redeem Fund shares indirectly through variable annuity contracts and variable life insurance policies offered through the separate accounts.

TAX INFORMATION

Provided that the Fund and separate accounts investing in the Fund satisfy applicable tax requirements, the Fund will not be subject to federal tax. Special tax rules apply to life insurance companies, variable annuity contracts and variable life insurance contracts. For information on federal income taxation of owners of variable annuity or variable life insurance contracts, see the prospectus for the applicable contract.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Fund and/or its related companies may pay participating insurance companies and securities dealers for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the insurance company and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your insurance company’s website for more information.

Investment Management Approach

INVESTMENT OBJECTIVE

The Fund seeks total return while seeking to provide volatility management. The Fund's investment objective may be changed without shareholder approval upon 60 days' notice.

PRINCIPAL INVESTMENT STRATEGIES

The Fund primarily seeks to achieve its investment objective by investing in a global portfolio of equity and fixed income asset classes. The Fund may invest in one or a combination of the following securities and instruments: pooled investment vehicles, including ETFs and other investment companies; equity securities and fixed income securities of U.S. and non-U.S. issuers; and derivatives that provide exposure to a broad spectrum of asset classes and geographic regions. Under normal market conditions, the Fund expects to invest at least 40% of its assets in equity investments and at least 20% of its assets in fixed income investments. The Investment Adviser makes investment decisions based upon its analysis of market factors around the world, and may allocate more of the Fund's assets to investments with strong recent performance and allocate assets away from investments with poor recent performance. The percentage of the Fund's portfolio exposed to any asset class or geographic region will vary from time to time as the weightings of the Fund change, and the Fund may not be invested in each asset class at all times. At times the Fund may be heavily invested in certain asset classes or geographic regions, depending on the asset allocation of the strategy. The Fund may invest without restriction as to issuer capitalization, currency, maturity or credit rating.

As part of the Fund's investment strategy, the Investment Adviser seeks to manage volatility and limit losses by allocating the Fund's assets away from risky investments in distressed or volatile market environments. Volatility is a statistical measurement of the magnitude of up and down fluctuations in the value of a financial instrument or index. In distressed or volatile market environments, the Fund may also hold significant amounts of U.S. Treasury, short-term, or other fixed income investments, including money market funds and repurchase agreements or cash, and at times may invest up to 100% of its assets in such investments. While the Investment Adviser attempts to manage the Fund's volatility, there can be no guarantee that the Fund will be successful.

The Fund's investments in derivatives may include: (i) futures contracts, including futures based on securities and/or indices; (ii) swaps, including interest rate, total return, variance, and/or index swaps, and swaps on futures contracts; (iii) options, including long and short positions in call options and put options on indices, or currencies, swaptions and options on futures contracts; and (iv) structured notes.

The Fund may engage in forward foreign currency transactions for both investment and hedging purposes.

The Fund intends to have investments economically tied to at least three countries, including the United States, and may invest in the securities of issuers in emerging market countries.

In determining whether an issuer is economically tied to a particular country, the Investment Adviser will consider whether the issuer:

- Has a class of securities whose principal securities market is in that country;
- Has its principal office in that country;
- Derives 50% or more of its total revenue or profit from goods produced, sales made or services provided in that country;
- Maintains 50% or more of its assets in that country; or
- Is otherwise determined to be economically tied to that country by the Investment Adviser in its discretion. For example, the Investment Adviser may use the classifications assigned by third parties, including an issuer's "country of risk" as determined by Bloomberg or the classifications assigned to an issuer by the Fund's benchmark index provider. These classifications are generally based on a number of criteria, including an issuer's country of domicile, the primary stock exchange on which an issuer's securities trade, the location from which the majority of an issuer's revenue is derived, and an issuer's reporting currency. Although the Investment Adviser may rely on these classifications, it is not required to do so.

The Fund may, from time to time, take temporary defensive positions that are inconsistent with the Fund's principal investment strategy in attempting to respond to adverse market, political or other conditions. For temporary defensive purposes, the Fund may invest up to 100% of its total assets in securities issued or guaranteed by the U.S. government, its agencies, instrumentalities or sponsored enterprises ("U.S. Government Securities"); commercial paper rated at least A-2 by S&P Global Ratings ("Standard & Poor's"), P-2 by Moody's Investors Service, Inc. ("Moody's"), or having a comparable credit rating from another nationally recognized statistical rating organization ("NRSRO") (or if unrated, determined by the Investment Adviser to be of comparable quality); certificates of deposit, bankers' acceptances, repurchase agreements, non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year; ETFs and other investment companies and cash items. **When the Fund's assets are invested in such instruments, the Fund may not be achieving its investment objective.**

The QIS team's investment selection process generally relies on quantitative techniques. From time to time the Investment Adviser may, in its discretion, also utilize a qualitative overlay. As a result of the qualitative overlay, the Fund's investments may not correspond to those generated by the Investment Adviser's proprietary models. The Fund may make investment decisions that deviate from those generated by the QIS team's proprietary models, at the discretion of the Investment Adviser, for a number of reasons including, but not limited to, corporate actions (e.g., reorganizations, mergers and buy-outs), industry events and/ or trading liquidity.

The Fund's benchmark index is the 60% MSCI World / 40% Bloomberg Barclays U.S. Treasury Composite Index. The MSCI World Index (Net, USD, Hedged) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of 23 developed markets. The Bloomberg Barclays U.S. Treasury Index (Total Return, USD, Unhedged) represents an unmanaged diversified portfolio of nominal fixed income securities issued by the U.S. Treasury. The Composite Index is a composite representation prepared by the Investment Adviser of the performance of the Fund's asset classes weighted according to their respective weightings in the Fund's target range.

SHARE OFFERING

Goldman Sachs Variable Insurance Trust (the "Trust") offers shares of the Fund to separate accounts of participating insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies. Institutional Shares of the Fund are not offered directly to the public. The participating insurance companies, not the owners of the variable annuity contracts or variable life insurance policies or participants therein, are shareholders of the Fund. The Fund pools the monies of these separate accounts and invests these monies in a portfolio of securities pursuant to the Fund's stated investment objective.

The investment objective and policies of the Fund may be similar to the investment objectives and policies of other mutual funds that the Investment Adviser manages. Although the objectives and policies may be similar, the investment results of the Fund may be higher or lower than the results of such other mutual funds. The Investment Adviser cannot guarantee, and makes no representation, that the investment results of similar funds will be comparable even though the funds have the same Investment Adviser.

ADDITIONAL FEES AND EXPENSES INFORMATION

"Acquired Fund Fees and Expenses" reflect the expenses (including the management fees) borne by the Fund through its ownership of shares in other investment companies.

ADDITIONAL PERFORMANCE INFORMATION

Note that the "Best Quarter" and "Worst Quarter" figures shown in the "Performance" section of the Fund's Summary section are applicable only to the time period covered by the bar chart.

OTHER INVESTMENT PRACTICES AND SECURITIES

Although the Fund's principal investment strategies are described in the Fund's Summary—Principal Strategy section of the Prospectus, the following tables identify some of the investment techniques that may (but are not required to) be used by the Fund in seeking to achieve its investment objective. Numbers in these tables show allowable usage only; for actual usage, consult the Fund's annual/semi-annual reports (when available). For more information about these and other investment practices and securities, see Appendix A.

The Fund publishes on its website (<http://www.gsamfunds.com/vit>) complete portfolio holdings for the Fund as of the end of each month subject to a ten calendar-day lag between the date of the information and the date on which the information is disclosed. In addition, the Fund publishes on its website selected portfolio holdings information as of the end of each month subject to a fifteen calendar-day lag between the date of the information and the date on which the information is disclosed. In addition, a description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

³. May be rated BB+ or lower by Standard & Poor's, Ba1 or lower by Moody's or have a comparable rating by another NRSRO at the time of investment.

Risks of the Fund

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any other governmental agency. The principal risks of the Fund are discussed in the Summary section of the Prospectus. The following section provides additional information on the risks that apply to the Fund, which may result in a loss of your investment. The risks applicable to the Fund are presented below in alphabetical order, and not in the order of importance or potential exposure. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective.

Global Trends Allocation	✓	✓	•	•	✓	✓	•	✓	✓	✓	✓	✓	•	✓								

■ **Absence of Regulation Risk**—The Fund engages in over-the-counter (“OTC”) transactions, which trade in a dealer network, rather than on an exchange. In general, there is less governmental regulation and supervision of transactions in the OTC markets (in which option contracts and certain options on swaps are generally traded) than of transactions entered into on organized exchanges.

■ **Credit/Default Risk**—An issuer or guarantor of fixed income securities or instruments held by the Fund (which may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation. The credit quality of the Fund’s portfolio securities or instruments may meet the Fund’s credit quality requirements at the time of purchase but then deteriorate thereafter, and such a deterioration can occur rapidly. In certain instances, the downgrading or default of a single holding or guarantor of the Fund’s holdings may impair the Fund’s liquidity and have the potential to cause significant NAV deterioration. These risks are more pronounced in connection with the Fund’s investments in non-investment grade fixed income securities.

■ **Derivatives Risk**—The Fund’s use of options, forwards, interest rate futures, interest rate swaps, credit default swaps and other derivative instruments may result in losses. These instruments, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other instruments, may be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations, liquidity risk and risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions. Derivatives may be used for both hedging and non-hedging purposes.

The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments, and there is no guarantee that the use of derivatives will achieve their intended result. If the Investment Adviser is incorrect in its expectation of the timing or level of fluctuation in securities prices, interest rates, currency prices or other variables, the use of derivatives could result in losses, which in some cases may be significant. A lack of correlation between changes in the value of derivatives and the value of the portfolio assets (if any) being hedged could also result in losses. In addition, there is a risk that the performance of the derivatives or other instruments used by the Investment Adviser to replicate the performance of a particular asset class may not accurately track the performance of that asset class.

As an investment company registered with the SEC, the Fund must identify on its books (often referred to as “asset segregation”) liquid assets, or engage in other SEC- or SEC staff-approved or other appropriate measures, to “cover” open positions with respect to certain kinds of derivative instruments. For more information about these practices, see Appendix A. As discussed in more detail in Appendix A and the SAI, the SEC adopted a final rule related to the use of derivatives, short sales, reverse repurchase agreements and certain other transactions by registered investment companies. In connection with the final rule, the SEC and its staff will rescind and withdraw applicable guidance and relief regarding asset segregation and coverage transactions reflected in the Fund’s asset segregation and cover practices discussed therein.

■ **Emerging Countries Risk**—Investments in securities of issuers located in emerging countries are subject to the risks associated

with investments in foreign securities. In addition, the securities markets of most emerging countries are less liquid, developed and efficient, are subject to greater price volatility, and have smaller market capitalizations. In addition, emerging markets and frontier countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. As a result, there could be less information available about issuers in emerging and frontier market countries, which could negatively affect the Investment Adviser's ability to evaluate local companies or their potential impact on the Fund's performance. Further, investments in securities of issuers located in certain emerging countries involve the risk of loss resulting from problems in share registration, settlement or custody, substantial economic, political and social disruptions and the imposition of exchange controls (including repatriation restrictions). The legal remedies for investors in emerging and frontier markets may be more limited than the remedies available in the U.S., and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited. These risks are not normally associated with investments in more developed countries. For more information about these risks, see Appendix A.

- **Expenses Risk**—By investing in pooled investment vehicles (including investment companies and ETFs), partnerships and REITs indirectly through the Fund, the investor will incur not only a proportionate share of the expenses of the other pooled investment vehicles, partnerships and REITs held by the Fund (including operating costs and investment management fees), but also expenses of the Fund.
- **Foreign Risk** —When the Fund invests in foreign securities, it may be subject to risk of loss not typically associated with U.S. issuers. Loss may result because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; less liquid, developed or efficient trading markets, greater volatility and less economic, political and social stability in the countries in which the Fund invests. Loss may also result from, among other things, deteriorating economic and business conditions in other countries, including the United States, regional and global conflicts, the imposition of exchange controls (including repatriation restrictions), sanctions, foreign taxes, confiscation of assets and property, trade restrictions (including tariffs), expropriations and other government restrictions by the United States and other governments, higher transaction costs, difficulty enforcing contractual obligations or from problems in share registration, settlement or custody. The Fund or the Investment Adviser may determine not to invest in, or may limit its overall investment in, a particular issuer, country or geographic region due to, among other things, heightened risks regarding repatriation restrictions, confiscation of assets and property, expropriation or nationalization. Geopolitical developments in certain countries in which the Fund may invest have caused, or may in the future cause, significant volatility in financial markets. For example, the United Kingdom (“UK”) withdrew from the European Union (“EU”) on January 31 2020 (commonly known as “Brexit”), which will likely result in increased market volatility and cause additional market disruption on a global basis. The UK and the EU signed the EU-UK Trade and Cooperation Agreement (“TCA”), which is an agreement on the terms governing certain aspects of the EU’s and UK’s relationship post Brexit. However, under the TCA, many aspects of the EU-UK relationship remain subject to further negotiation. Although the full effects of Brexit are unknown at this time, Brexit may continue to result in fluctuations of exchange rates, increased illiquidity, inflation, and changes in legal and regulatory regimes to which certain of the Fund’s assets are subject. These and other geopolitical developments could negatively impact the value of the Fund’s investments.

The Fund’s investments in foreign securities may also be subject to foreign currency risk, the risk of negative foreign currency rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund may have exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. Foreign risks will normally be greatest when the Fund invests in securities of issuers located in emerging countries. For more information about these risks, see Appendix A.

- **Geographic Risk**—If the Fund focuses its investments in securities of issuers located in a particular country or geographic region, it will subject the Fund, to a greater extent than if its investments were less focused, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that country or region, such as: adverse securities markets; adverse exchange rates; adverse social, political, regulatory, economic, business, environmental or other developments; or natural disasters.
- **Interest Rate Risk**—When interest rates increase, fixed income securities or instruments held by the Fund (which may include inflation protected securities) will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. The risks associated with changing interest rates may have unpredictable effects on the markets and the Fund’s investments. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Fund.

Interest rates in the United States are currently at historically low levels. Certain countries have experienced negative interest rates on certain fixed-income instruments. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, may result in heightened market volatility and may detract from Fund performance to the extent the Fund is exposed to such interest rates and/or volatility.

- **Large Shareholder Transactions Risk**—The Fund may experience adverse effects when certain large shareholders, such as other funds, participating insurance companies, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund’s NAV and liquidity. Similarly, large Fund share purchases may adversely affect the Fund’s performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also increase transaction costs. In addition, a large redemption could result in the Fund’s current expenses being allocated over a smaller asset base, leading to an increase in the Fund’s expense ratio.
- **Leverage Risk**—Leverage creates exposure to potential gains and losses in excess of the initial amount invested. Borrowing and the use of derivatives may result in leverage and may make the Fund more volatile. When the Fund uses leverage, the sum of the Fund’s investment exposures may significantly exceed the amount of assets invested in the Fund, although these exposures may vary over time. Relatively small market movements may result in large changes in the value of a leveraged investment. The Fund will identify liquid assets on its books or otherwise cover transactions that may give rise to such risk, to the extent required by applicable law. The use of leverage may cause the Fund to liquidate portfolio positions to satisfy its obligations or to meet segregation requirements when it may not be advantageous to do so. The use of leverage by the Fund can substantially increase the adverse impact to which the Fund’s investment portfolio may be subject.
- **Liquidity Risk**—The Fund may invest to a greater degree in securities or instruments that trade in lower volumes and may make investments that are less liquid than other investments. Also, the Fund may make investments that may become less liquid in response to market developments or adverse investor perceptions. Investments that are illiquid or that trade in lower volumes may be more difficult to value. When there is no willing buyer and investments cannot be readily sold at the desired time or price, the Fund may have to accept a lower price or may not be able to sell the security or instrument at all. An inability to sell one or more portfolio positions can adversely affect the Fund’s value or prevent the Fund from being able to take advantage of other investment opportunities.

To the extent that the traditional dealer counterparties that engage in fixed income trading do not maintain inventories of bonds (which provide an important indication of their ability to “make markets”) that keep pace with the growth of the bond markets over time, relatively low levels of dealer inventories could lead to decreased liquidity and increased volatility in the fixed income markets. Additionally, market participants other than the Fund may attempt to sell fixed income holdings at the same time as the Fund, which could cause downward pricing pressure and contribute to decreased liquidity.

Because the Fund may invest in non-investment grade fixed income securities, small- and mid-capitalization stocks, REITs and/or emerging country issuers, the Fund may be especially subject to the risk that during certain periods, the liquidity of particular issuers or industries, or all securities within a particular investment category, may shrink or disappear suddenly and without warning as a result of adverse economic, market or political events, or adverse investor perceptions, whether or not accurate.

Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period stated in the Prospectus or without significant dilution to remaining investors’ interests because of unusual market conditions, an unusually high volume of redemption requests or other reasons. While the Fund reserves the right to meet redemption requests through in-kind distributions, the Fund may instead choose to raise cash to meet redemption requests through sales of portfolio securities or permissible borrowings. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund’s NAV and dilute remaining investors’ interests.

Certain shareholders, including clients or affiliates of the Investment Adviser and/or other funds managed by the Investment Adviser, may from time to time own or control a significant percentage of the Fund’s shares. Redemptions by these shareholders of their shares of the Fund may further increase the Fund’s liquidity risk and may impact the Fund’s NAV. These shareholders may include, for example, certain participating insurance companies, accounts or Goldman Sachs affiliates and other shareholders, whose buy-sell decisions are controlled by a single decision-maker.

- **Management Risk**—A strategy used by the Investment Adviser may fail to produce the intended results.
- **Market Risk**—The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world. Price changes may be temporary or last for extended periods. The Fund’s investments may be overweighted from time to time in one or more sectors or countries, which will increase the Fund’s exposure to risk of loss from adverse developments affecting those sectors or countries.

Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. Furthermore, local, regional and global events such as war, acts of terrorism, social unrest, natural disasters, the spread of infectious illness or other public health threats could also adversely impact issuers, markets and economies, including in ways that cannot necessarily be

foreseen. The Fund could be negatively impacted if the value of a portfolio holding were harmed by such political or economic conditions or events. In addition, governmental and quasi-governmental organizations have taken a number of unprecedented actions designed to support the markets. Such conditions, events and actions may result in greater market risk.

- **Mid-Cap and Small-Cap Risk**—The securities of mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. Securities of such issuers may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price. Both mid-capitalization and small-capitalization companies often have narrower markets and more limited managerial and financial resources than larger, more established companies. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio. Generally, the smaller the company size, the greater these risks become.
- **NAV Risk**—The net asset value of the Fund and the value of your investment will fluctuate.
- **Non-Hedging Foreign Currency Trading Risk**—The Fund may engage in forward foreign currency transactions for both hedging and non-hedging purposes. The Fund’s Investment Adviser may purchase or sell foreign currencies through the use of forward contracts based on the Investment Adviser’s judgment regarding the direction of the market for a particular foreign currency or currencies. In pursuing this strategy, the Investment Adviser seeks to profit from anticipated movements in currency rates by establishing “long” and/or “short” positions in forward contracts on various foreign currencies. Foreign exchange rates can be extremely volatile and a variance in the degree of volatility of the market or in the direction of the market from the Investment Adviser’s expectations may produce significant losses to the Fund. Some of the transactions may also be subject to interest rate risk.
- **Non-Investment Grade Fixed Income Securities Risk**—Non-investment grade fixed income securities and unrated securities of comparable credit quality (commonly known as “junk bonds”) are considered speculative and are subject to the increased risk of an issuer’s inability to meet principal and interest payment obligations. These securities may be subject to greater price volatility due to such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond markets generally and less liquidity.
- **Pooled Investments Risk**—By investing in pooled investment vehicles (including investment companies and ETFs), partnerships and REITs indirectly through the Fund, investors will incur a proportionate share of the expenses of the other pooled investment vehicles, partnerships and REITs held by the Fund (including operating costs and investment management fees), in addition to the fees and expenses regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investments in direct proportion to the amount of assets the Fund invests therein.
- **Portfolio Turnover Rate Risk**—The Fund may engage in active and frequent trading of portfolio securities to achieve its principal investment strategies. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which must be borne by the Fund and its shareholders.
- **REIT Risk**— Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs whose underlying properties are concentrated in a particular industry or geographic region are also subject to risks affecting such industries and regions. The securities of REITs involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements because of interest rate changes, economic conditions and other factors. REITs may also fail to qualify for tax free pass-through of income or may fail to maintain their exemptions from investment company registration. Securities of such issuers may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price.

Individuals and certain other noncorporate entities are generally eligible for a 20% deduction with respect to taxable ordinary dividends from REITs. Applicable Treasury regulations permit regulated investment companies such as the Fund to pass through the 20% deduction to shareholders.

- **Sovereign Default Risk**—The issuer of non-U.S. sovereign debt held by the Fund or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay the principal or interest when due. This may result from political or social factors, the general economic environment of a country or levels of foreign debt or foreign currency exchange rates. Sovereign risk includes the following risks:
 - **Political Risk**—The risks associated with the general political and social environment of a country. These factors may include among other things government instability, poor socioeconomic conditions, corruption, lack of law and order, lack of democratic accountability, poor quality of the bureaucracy, internal and external conflict, and religious and ethnic tensions. High political risk can impede the economic welfare of a country.

- **Economic Risk**—The risks associated with the general economic environment of a country. These can encompass, among other things, low quality and growth rate of Gross Domestic Product (“GDP”), high inflation or deflation, high government deficits as a percentage of GDP, weak financial sector, overvalued exchange rate, and high current account deficits as a percentage of GDP.
- **Repayment Risk**—A country may be unable to pay its external debt obligations in the immediate future. Repayment risk factors may include but are not limited to high foreign debt as a percentage of GDP, high foreign debt service as a percentage of exports, low foreign exchange reserves as a percentage of short-term debt or exports, and an unsustainable exchange rate structure.
- **Stock Risk**—Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future. Stock prices may fluctuate from time to time in response to the activities of individual companies and in response to general market and economic conditions. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments, and the stock prices of such companies may suffer a decline in response.
- **Swaps Risk**—The use of swaps is a highly specialized activity which involves investment techniques, risk analyses and tax planning different from those associated with ordinary portfolio securities transactions. The Fund’s transactions in swaps may be significant. These transactions can result in sizable realized and unrealized capital gains and losses relative to the gains and losses from the Fund’s direct investments in securities.

Transactions in swaps can involve greater risks than if the Fund had invested in securities directly since, in addition to general market risks, swaps may be leveraged and subject to illiquidity risk, counterparty risk, credit risk and pricing risk. Regulators also may impose limits on an entity’s or group of entities’ positions in certain swaps. However, certain risks are reduced (but not eliminated) if the Fund invests in cleared swaps, which are transacted through a FCM and cleared through a clearinghouse that serves as a central counterparty.

Because uncleared, bilateral swap agreements are two-party contracts and because they may have terms of greater than seven days, these swaps may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap in the event of the default or bankruptcy of a swap counterparty. Many swaps are complex and valued subjectively. Swaps and other derivatives may also be subject to pricing or “basis” risk, which exists when a particular derivative diverges from the price of corresponding cash market instruments. Under certain market conditions it may not be economically feasible to initiate a transaction or liquidate a position in time to avoid a loss or take advantage of an opportunity. If a swap transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses.

The value of swaps can be very volatile, and a variance in the degree of volatility or in the direction of securities prices from the Investment Adviser’s expectations may produce significant losses in the Fund’s investments in swaps. In addition, a perfect correlation between a swap and a security position may be impossible to achieve. As a result, the Investment Adviser’s use of swaps may not be effective in fulfilling the Investment Adviser’s investment strategies and may contribute to losses that would not have been incurred otherwise.

- **Treasury Inflation Protected Securities Risk**—The value of TIPS generally fluctuates in response to inflationary concerns. As inflationary expectations increase, TIPS will become more attractive, because they protect future interest payments against inflation. Conversely, as inflationary concerns decrease, TIPS will become less attractive and less valuable. However, repayment of the face value upon maturity is guaranteed by the U.S. government, even during periods of deflation that cause the principal value of TIPS to decline. Nevertheless, if the Fund purchases TIPS in the secondary market, where principal values have been adjusted upward due to inflation since issuance, the Fund may experience a loss if there is a subsequent period of deflation. If inflation is lower than expected during the period the Fund holds a TIPS, the Fund may earn less on the security than on a conventional bond.
- **U.S. Government Securities Risk**—The U.S. government may not provide financial support to U.S. government agencies, instrumentalities or sponsored enterprises if it is not obligated to do so by law. U.S. Government Securities issued by those agencies, instrumentalities and sponsored enterprises, including those issued by Fannie Mae, Freddie Mac and the Federal Home Loan Banks, are neither issued nor guaranteed by the U.S. Treasury and, therefore, are not backed by the full faith and credit of the United States. The maximum potential liability of the issuers of some U.S. Government Securities held by the Fund may greatly exceed their current resources, including any legal right to support from the U.S. Treasury. It is possible that issuers of U.S. Government Securities will not have the funds to meet their payment obligations in the future. Fannie Mae and Freddie Mac have been operating under conservatorship, with the Federal Housing Finance Agency (“FHFA”) acting as their conservator, since September 2008. The entities are dependent upon the continued support of the U.S. Department of the Treasury and FHFA in order to continue their business operations. These factors, among others, could affect the future status and role of Fannie Mae and Freddie Mac and the value of their securities and the securities which they guarantee. Additionally, the U.S. government and its agencies and instrumentalities do not guarantee the market values of their securities, which may fluctuate.

More information about the Fund's portfolio securities and investment techniques, and their associated risks, is provided in Appendix A. You should consider the investment risks discussed in this section and in Appendix A. Both are important to your investment choice.

Service Providers

INVESTMENT ADVISER

Investment Adviser

Goldman Sachs Asset Management, L.P.
200 West Street
New York, NY 10282

GSAM has been registered as an investment adviser with the SEC since 1990 and is an indirect, wholly-owned subsidiary of The Goldman Sachs Group, Inc. and an affiliate of Goldman Sachs & Co. LLC (“Goldman Sachs”). Founded in 1869, The Goldman Sachs Group, Inc. is a publicly-held financial holding company and a leading global investment banking, securities and investment management firm. As of December 31, 2020, GSAM, including its investment advisory affiliates, had assets under supervision of approximately \$1.95 trillion.

The Investment Adviser provides day-to-day advice regarding the Fund’s portfolio transactions. The Investment Adviser makes the investment decisions for the Fund and places purchase and sale orders for the Fund’s portfolio transactions in U.S. and foreign markets. As permitted by applicable law, these orders may be directed to any executing brokers, dealers, futures commission merchants (“FCMs”) or other counterparties, including Goldman Sachs and its affiliates. While the Investment Adviser is ultimately responsible for the management of the Fund, it is able to draw upon the research and expertise of its asset management affiliates for portfolio decisions and management with respect to certain portfolio securities. In addition, the Investment Adviser has access to the research and certain proprietary technical models developed by Goldman Sachs (subject to legal, internal, regulatory and Chinese wall restrictions), and will apply quantitative and qualitative analysis in determining the appropriate allocations among categories of issuers and types of securities.

The Investment Adviser also performs the following additional services for the Fund (to the extent not performed by others pursuant to agreements with the Fund):

- Supervises all non-advisory operations of the Fund
- Provides personnel to perform necessary executive, administrative and clerical services to the Fund
- Arranges for the preparation of all required tax returns, reports to shareholders, prospectuses and SAIs and other reports filed with the SEC and other regulatory authorities
- Maintains the records of the Fund
- Provides office space and all necessary office equipment and services

An investment in the Fund may be negatively impacted because of the operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third-party service providers or trading counterparties. The use of certain investment strategies that involve manual or additional processing, such as over-the-counter derivatives, increases these risks. Although the Fund attempts to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect the Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. The Fund and its shareholders could be negatively impacted as a result.

From time to time, Goldman Sachs or its affiliates may invest “seed” capital in the Fund. These investments are generally intended to enable the Fund to commence investment operations and achieve sufficient scale. Goldman Sachs and its affiliates may hedge the exposure of the seed capital invested in the Fund by, among other things, taking an offsetting position in the benchmark of the Fund.

MANAGEMENT FEE AND OTHER EXPENSES

As compensation for its services and its assumption of certain expenses, the Investment Adviser is entitled to a fee, computed daily and payable monthly, at the annual rate listed below (as a percentage of the Fund’s average daily net assets):

Fund	Contractual Management Fee Annual Rate	Average Daily Net Assets	Actual Rate For the Fiscal Year Ended December 31, 2020*
Global Trends Allocation	0.79%	First \$1 Billion	0.59%
	0.71%	Next \$1 Billion	
	0.68%	Next \$3 Billion	
	0.66%	Next \$3 Billion	

Fund	Contractual Management Fee Annual Rate	Average Daily Net Assets	Actual Rate For the Fiscal Year Ended December 31, 2020*
	0.65%	Over \$8 Billion	

* The Actual Rate may not correlate to the Contractual Management Fee Annual Rate as a result of management fee waivers that may be in effect from time to time.

The Investment Adviser has agreed to (i) waive a portion of the management fee in order to achieve an effective net management fee rate of 0.67% of the Fund's average daily net assets; and (ii) waive a portion of its management fee payable by the Fund in an amount equal to any management fees it earns as an investment adviser to any affiliated funds in which the Fund invests, except those management fees it earns from the Fund's investments of cash collateral received in connection with securities lending transactions in affiliated funds. The management fee waivers will remain in effect through at least April 30, 2022, and prior to such date, the Investment Adviser may not terminate the arrangements without the approval of the Board of Trustees. The management fee waivers may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so.

In addition to the management fee waivers described above, the Investment Adviser may waive an additional portion of its management fee, from time to time, and may discontinue or modify any such waivers in the future, consistent with the terms of any fee waiver arrangements that may be in place.

A discussion regarding the basis for the Board of Trustees' approval of the Management Agreement for the Fund in 2020 is available in the Fund's Semi-Annual report dated June 30, 2020.

The Investment Adviser has agreed to reduce or limit "Other Expenses" (excluding acquired fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.004% of the Fund's average daily net assets through at least April 30, 2022, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees. The expense limitation may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so. The Fund's "Other Expenses" may be further reduced by any custody and transfer agency fee credits received by the Fund.

The Investment Adviser, distributor, and/or their affiliates may, from time to time, pay compensation from their own assets (and not as an additional charge to the Fund) to participating insurance companies for administrative services that such companies provide to their variable annuity and variable life insurance contract owners who are invested in the Fund and for other purposes. In addition, the Investment Adviser, distributor, and/or their affiliates may pay compensation from their own assets (and not as an additional charge to the Fund) to various securities dealers (including affiliates of participating insurance companies) ("Intermediaries") that distribute variable annuity contracts and/or variable life insurance contracts of such companies in connection with the sale, distribution and/or servicing of such contracts. Such payments are intended to compensate Intermediaries for, among other things: marketing shares of the Fund and other Goldman Sachs Funds, which may consist of payments relating to funds included on preferred or recommended fund lists or in certain sales programs from time to time sponsored by the Intermediaries; access to the Intermediaries' registered representatives or salespersons, including at conferences and other meetings; assistance in training and education of personnel; marketing support; the provision of analytical or other data to the Investment Adviser or its affiliates relating to sales of shares of the Fund and other Goldman Sachs Funds; the support or purchase of technology platforms/ software; and/or other specified services intended to assist in the distribution and marketing of the Fund and other Goldman Sachs Funds, including provision of consultative services to the Investment Adviser or its affiliates relating to marketing and/or sale of shares of the Fund and other Goldman Sachs Funds. The payments may also, to the extent permitted by applicable regulations, sponsor various trainings and educational programs. The additional payments by the Investment Adviser, distributor and/or their affiliates may also compensate Intermediaries for subaccounting, administrative and/or shareholder processing services that are in addition to the fees paid for these services by the Fund. The amount of these additional payments is normally not expected to exceed 0.50% (annualized) of the amount sold or invested through the Intermediaries. Please refer to the "Payments to Others (Including Intermediaries)" section of the SAI for more information about these payments.

The payments made by the Investment Adviser, distributor and/or their affiliates may differ for different participating insurance companies and Intermediaries. The presence of these payments and the basis on which an Intermediary compensates its registered representatives or salespersons may create an incentive for a particular Intermediary, registered representative, salesperson or participating insurance company to highlight, feature, offer or recommend the Fund based, at least in part, on the level of compensation paid. You should contact your participating insurance company or Intermediary for more information about the payments they receive and any potential conflicts of interest.

FUND MANAGERS**Quantitative Investment Strategies (“QIS”) Team**

The individuals jointly and primarily responsible for the day-to-day management of the Fund are listed below. The Fund’s portfolio managers’ individual responsibilities may differ and may include, among other things, development and maintenance of quantitative models and processes in combination with a qualitative overlay, asset allocation, risk budgeting and general oversight of research, implementation processes and the management of the Fund’s portfolio.

Name and Title	Fund Responsibility	Years Primarily Responsible	Five Year Employment History
Federico Gilly Managing Director	Portfolio Manager— Global Trends Allocation Fund	Since 2018	Mr. Gilly is Co-Head of research, portfolio management and portfolio construction for the Alternative Investment Strategies (AIS) Team within GSAM’s Quantitative Investment Strategies (QIS) platform. He joined Goldman Sachs in 2000.
Oliver Bunn Vice President	Portfolio Manager— Global Trends Allocation Fund	Since 2018	Mr. Bunn is a portfolio manager and researcher for the Alternative Investment Strategies (AIS) Team within GSAM’s Quantitative Investment Strategies (QIS) platform. He joined Goldman Sachs in 2014.

For information about portfolio manager compensation, other accounts managed by a portfolio manager and portfolio manager ownership of securities in the Fund, see the SAI.

DISTRIBUTOR AND TRANSFER AGENT

Goldman Sachs, 200 West Street, New York, NY 10282, serves as the exclusive distributor (the “Distributor”) of the Fund’s shares. Goldman Sachs, 71 S. Wacker Drive, Chicago, IL 60606, also serves as the Fund’s transfer agent (the “Transfer Agent”) and, as such, performs various shareholder servicing functions.

For its transfer agency services, Goldman Sachs is entitled to receive a transfer agency fee equal, on an annualized basis, to 0.02% of average daily net assets with respect to the Institutional Shares.

ACTIVITIES OF GOLDMAN SACHS AND ITS AFFILIATES AND OTHER ACCOUNTS MANAGED BY GOLDMAN SACHS

The involvement of the Investment Adviser, Goldman Sachs and their affiliates in the management of, or their interest in, other accounts and other activities of Goldman Sachs will present conflicts of interest with respect to the Fund and will, under certain circumstances, limit the Fund’s investment activities. Goldman Sachs is a worldwide, full service investment banking, broker dealer, asset management and financial services organization and a major participant in global financial markets that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals. As such, it acts as a broker-dealer, investment adviser, investment banker, underwriter, research provider, administrator, financier, adviser, market maker, trader, prime broker, derivatives dealer, clearing agent, lender, counterparty, agent, principal, distributor, investor or in other commercial capacities for accounts or companies or affiliated or unaffiliated investment funds (including pooled investment vehicles and private funds) in which one or more accounts, including the Fund, invest. In those and other capacities, Goldman Sachs and its affiliates advise and deal with clients and third parties in all markets and transactions and purchase, sell, hold and recommend a broad array of investments, including securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for their own accounts or for the accounts of their customers and have other direct and indirect interests in the global fixed income, currency, commodity, equities, bank loans and other markets and the securities and issuers in which the Fund directly and indirectly invests. Thus, it is expected that the Fund will have multiple business relationships with and will invest in, engage in transactions with, make voting decisions with respect to, or obtain services from entities for which Goldman Sachs and its affiliates perform or seek to perform investment banking or other services. The Investment Adviser and/or certain of its affiliates are the managers of the Goldman Sachs Funds. The Investment Adviser and its affiliates earn fees from this and other relationships with the Fund. Although management fees paid by the Fund to the Investment Adviser and certain other fees paid to the Investment Adviser’s affiliates are based on asset levels, the fees are not directly contingent on Fund performance, and the Investment Adviser and its affiliates will still receive significant compensation from the Fund even if shareholders lose money. Goldman Sachs and its affiliates engage in proprietary trading and advise accounts and funds which have investment objectives similar to those of the Fund and/or which engage in and compete for transactions in the same types of securities, currencies and instruments as the Fund. Goldman Sachs and its affiliates will not have any obligation to make available any information regarding their proprietary activities or strategies, or the activities or strategies used for other accounts managed by them, for the benefit of the management of the Fund. The results of the Fund’s investment activities, therefore, will likely differ from those of Goldman Sachs, its affiliates, and other

accounts managed by Goldman Sachs, and it is possible that the Fund could sustain losses during periods in which Goldman Sachs and its affiliates and other accounts achieve significant profits on their trading for proprietary or other accounts. In addition, the Fund may enter into transactions in which Goldman Sachs and its affiliates or their other clients have an adverse interest. For example, the Fund may take a long position in a security at the same time that Goldman Sachs and its affiliates or other accounts managed by the Investment Adviser or its affiliates take a short position in the same security (or vice versa). These and other transactions undertaken by Goldman Sachs, its affiliates or Goldman Sachs-advised clients may, individually or in the aggregate, adversely impact the Fund. Transactions by one or more Goldman Sachs-advised clients or the Investment Adviser may have the effect of diluting or otherwise disadvantaging the values, prices or investment strategies of the Fund. The Fund's activities will, under certain circumstances, be limited because of regulatory restrictions applicable to Goldman Sachs and its affiliates, and/or their internal policies designed to comply with such restrictions. As a global financial services firm, Goldman Sachs and its affiliates also provide a wide range of investment banking and financial services to issuers of securities and investors in securities. Goldman Sachs, its affiliates and others associated with it are expected to create markets or specialize in, have positions in and/or effect transactions in, securities of issuers held by the Fund, and will likely also perform or seek to perform investment banking and financial services for one or more of those issuers. Goldman Sachs and its affiliates are expected to have business relationships with and purchase or distribute or sell services or products from or to distributors, consultants or others who recommend the Fund or who engage in transactions with or for the Fund. For more information about conflicts of interest, see the section entitled "Potential Conflicts of Interest" in the SAI.

The Fund will, from time to time, make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Fund's portfolio investment transactions, in accordance with applicable law.

Under a securities lending program approved by the Fund's Board of Trustees, the Fund has retained an affiliate of the Investment Adviser to serve as a securities lending agent for the Fund to the extent that the Fund engages in the securities lending program. For these services, the lending agent would receive a fee from the Fund, including a fee based on the returns earned on the Fund's investment of the cash received as collateral for the loaned securities. The Board of Trustees periodically reviews reports on portfolio securities loan transactions for which the affiliated lending agent has acted as lending agent. In addition, the Fund may make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Fund's portfolio investment transactions, in accordance with applicable law.

Distributions

Distributions from investment company taxable income and distributions from net realized capital gains (if any) are normally declared and paid by the Fund at least annually. In addition the Fund may occasionally make a distribution at a time when it is not normally made. Over the course of the year, accrued and paid distributions will equal all or substantially all of the Fund's investment company taxable income and net realized capital gains. All distributions paid on Institutional Shares will be automatically reinvested in additional Institutional Shares of the Fund at the NAV of such shares on the payment date, unless an insurance company's separate account is permitted to hold cash and elects to receive payment in cash. From time to time, a portion of the Fund's distributions may constitute a return of capital for tax purposes, and/or may include amounts in excess of the Fund's net investment income for the period in accordance with generally accepted accounting principles (GAAP).

Shareholder Guide

The following section will provide you with answers to some of the most frequently asked questions regarding buying and selling the Fund's Institutional Shares.

How Can I Purchase Or Sell Institutional Shares Of The Fund?

Institutional Shares of the Fund are not sold directly to the public. Instead, Fund shares are sold to separate accounts that fund variable annuity and variable life insurance contracts issued by participating insurance companies. You may purchase or sell (redeem) shares of the Fund through variable annuity contracts and variable life insurance policies offered through the separate accounts. The variable annuity contracts and variable life insurance policies are described in the separate prospectuses issued by the participating insurance companies. You should refer to those prospectuses for information on how to purchase a variable annuity contract or variable life insurance policy, how to select a specific Fund as an investment option for your contract or policy and how to redeem monies from the Fund.

The separate accounts of the participating insurance companies place orders to purchase and redeem shares of the Fund based on, among other things, the amount of premium payments to be invested and the amount of surrender and transfer requests (as defined in the prospectus describing the variable annuity contracts and variable life insurance policies issued by the participating insurance companies) to be effected on that day pursuant to variable annuity contracts and variable life insurance policies.

Shares of the Fund may be purchased by separate accounts of both affiliated and unaffiliated participating insurance companies in order to fund both variable annuity and variable life insurance contracts, and also may be purchased by qualified plans. This may present certain conflicts of interests among variable annuity owners, variable life insurance policy owners and plan investors. The Trust's Board of Trustees will monitor the Trust for the existence of any material irreconcilable conflict of interest. The Trust currently does not foresee any disadvantages to the holders of variable annuity contracts and variable life insurance policies arising from the fact that interests of the holders of variable annuity contracts and variable life insurance policies may differ due to differences of tax treatment or other considerations or due to conflicts among the participating insurance companies. If, however, a material irreconcilable conflict arises between the holders of variable annuity contracts and variable life insurance policies of participating insurance companies, a participating insurance company may be required to withdraw the assets allocable to some or all of the separate accounts from the Fund. Any such withdrawal could disrupt orderly portfolio management to the potential detriment of such holders.

Shares of the Fund (and other existing and new funds that might be added to the Trust) may also be offered to:

- Unregistered separate accounts of various participating insurance companies through which variable annuity contracts and variable life insurance policies are sold in non-public offerings.
- Unregistered separate accounts of various participating insurance companies through which variable annuity contracts and variable life insurance policies are offered exclusively to qualified pension and profit-sharing plans and/or certain governmental plans.
- Qualified pension and profit-sharing plans. The Trust does not currently anticipate offering shares directly to such plans.

In addition to Institutional Shares, the Fund offers another class of shares. This other share class is subject to different fees and expenses (which affect performance) and is entitled to different services than Institutional Shares. Information regarding this other share class can be obtained from Goldman Sachs by calling the number on the back cover of the Prospectus.

How Are Shares Priced?

Institutional Shares of the Fund are purchased and sold at the Fund's next-determined NAV per share *after* the Transfer Agent or participating insurance company has received and accepted the order in proper form. The class generally calculates its NAV as follows:

$$\text{NAV} = \frac{\text{(Value of Assets of the Class)} - \text{(Liabilities of the Class)}}{\text{Number of Outstanding Shares of the Class}}$$

The Fund's investments for which market quotations are readily available are valued at market value on the basis of quotations provided by pricing services or securities dealers. If accurate quotations are not readily available, if the Fund's fund accounting agent is unable for other reasons to facilitate pricing of individual securities or calculate the Fund's NAV, or if the Investment Adviser believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined in good faith under valuation procedures established by the Board of Trustees. Thus, such pricing may be based on subjective judgments and it is possible that the prices resulting from such valuation procedures may differ materially from the value realized on a sale. Cases where there is no clear indication of the value of the Fund's investments include, among others, situations where a security or other asset or liability does not have a price source or a price is unavailable.

Equity securities listed on an exchange are generally valued at the last available sale price on the exchange on which they are principally traded. To the extent that the Fund invests in foreign equity securities, “fair value” prices, if available, are provided by an independent third-party pricing (fair value) service in accordance with the fair value procedures approved by the Board of Trustees. Fair value prices are used because many foreign markets operate at times that do not coincide with those of the major U.S. markets. Events that could affect the values of foreign portfolio holdings may occur between the close of the foreign market and the time of determining the NAV, and would not otherwise be reflected in the NAV.

Fixed income securities are generally valued on the basis of prices (including evaluated prices) and quotations provided by pricing services or securities dealers. Pricing services may use matrix pricing or valuation models, which utilize certain inputs and assumptions, including, but not limited to, yield or price with respect to comparable fixed income securities, to determine current value. Pricing services generally value fixed income securities assuming orderly transactions of an institutional round lot size, but the Fund may hold or transact in such securities in smaller odd lot sizes. Odd lots may trade at lower prices than institutional round lots.

Investments in other open-end registered investment companies (if any), excluding investments in ETFs, are valued based on the NAV of those open-end registered investment companies (which may use fair value pricing as discussed in their prospectuses). Investments in ETFs will generally be valued at the last sale price or official closing price on the exchange on which they are principally traded.

In addition, the Investment Adviser, consistent with its procedures and applicable regulatory guidance, may (but need not) determine to make an adjustment to the previous closing prices of either domestic or foreign securities in light of significant events, to reflect what it believes to be the fair value of the securities at the time of determining the Fund’s NAV. Significant events that could affect a large number of securities in a particular market may include, but are not limited to: situations relating to one or more single issuers in a market sector; significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions or unscheduled market closings; equipment failures; natural or man made disasters or acts of God; armed conflicts; governmental actions or other developments; as well as the same or similar events which may affect specific issuers or the securities markets even though not tied directly to the securities markets. Other significant events that could relate to a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; corporate announcements, including those relating to earnings, products and regulatory news; significant litigation; ratings downgrades; bankruptcies; and trading limits or suspensions.

One effect of using an independent third-party pricing (fair value) service and fair valuation may be to reduce stale pricing arbitrage opportunities presented by the pricing of Fund shares. However, it involves the risk that the values used by the Fund to price its investments may be different from those used by other investment companies and investors to price the same investments.

Please note the following with respect to the price at which your transactions are processed:

- NAV per share of each share class is generally calculated by the Fund’s fund accounting agent on each business day as of the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern time) or such other times as the New York Stock Exchange or NASDAQ market may officially close. Fund shares will generally not be priced on any day the New York Stock Exchange is closed, although Fund shares may be priced on such days if the Securities Industry and Financial Markets Association (“SIFMA”) recommends that the bond markets remain open for all or part of the day.
- On any business day when the SIFMA recommends that the bond markets close early, the Fund reserves the right to close at or prior to the SIFMA recommended closing time. If the Fund does so, it will cease granting same business day credit for purchase and redemption orders received after the Fund’s closing time and credit will be given on the next business day.
- The Trust reserves the right to reprocess purchase (including dividend reinvestments), redemption and exchange transactions that were processed at a NAV that is subsequently adjusted, and to recover amounts from (or distribute amounts to) shareholders accordingly based on the official closing NAV, as adjusted.
- The Trust reserves the right to advance the time by which purchase and redemption orders must be received for same business day credit as otherwise permitted by the SEC.

Consistent with industry practice, investment transactions not settling on the same day are recorded and factored into the Fund’s NAV on the business day following trade date (T+1). The use of T+1 accounting generally does not, but may, result in a NAV that differs materially from the NAV that would result if all transactions were reflected on their trade dates.

Note: The time at which transactions and shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on the New York Stock Exchange is stopped at a time other than its regularly scheduled closing time. In the event the New York Stock Exchange does not open for business, the Trust may, but is not required to, open the Fund for purchase, redemption and exchange transactions if the Federal Reserve wire payment system is open. To learn whether the Fund is open for business during this situation, please call the appropriate phone number located on the back cover of the Prospectus.

Foreign securities may trade in their local markets on days the Fund is closed. As a result, if the Fund holds foreign securities, its NAV may be impacted on days when investors may not purchase or redeem Fund shares.

The Fund relies on various sources to calculate its NAV. The ability of the Fund's fund accounting agent to calculate the NAV per share is subject to operational risks associated with processing or human errors, systems or technology failures, cyber attacks and errors caused by third party service providers, data sources, or trading counterparties. Such failures may result in delays in the calculation of the Fund's NAV and/or the inability to calculate NAV over extended time periods. The Fund may be unable to recover any losses associated with such failures. In addition, if the third party service providers and/or data sources upon which the Fund directly or indirectly relies to calculate its NAV or price individual securities are unavailable or otherwise unable to calculate the NAV correctly, it may be necessary for alternative procedures to be utilized to price the securities at the time of determining the Fund's NAV.

Do I Have To Pay Any Fees When Purchasing Or Selling Institutional Shares Of The Fund?

The Fund does not charge any fees when it sells or redeems its shares. Surrender charges, mortality and expense risk fees and other charges may be assessed by participating insurance companies under the variable annuity contracts or variable life insurance policies. These fees should be described in the participating insurance companies' prospectuses.

What Else Should I Know About Institutional Share Purchases And Redemptions?

The Trust reserves the right to:

- Suspend the right of redemption under certain extraordinary circumstances in accordance with the rules of the SEC.
- Suspend the offering of shares for a period of time.
- Reject any purchase order.
- Close the Fund to new investors from time to time and reopen the Fund whenever it is deemed appropriate by the Fund's Investment Adviser.
- Redeem your shares in the case of actual or suspected threatening conduct or actual or suspected fraudulent, suspicious or illegal activity by you or any other individual associated with your account.
- Pay redemptions by a distribution in-kind of securities (instead of cash). If you receive redemption proceeds in-kind, you should expect to incur transaction costs upon the disposition of those securities. In addition, if you receive redemption proceeds in-kind, you will be subject to market gains or losses upon the disposition of those securities.

The Fund will be deemed to have received an order for purchase, redemption or exchange of Fund Shares when the order is accepted in proper form by the Transfer Agent or a participating insurance company on a business day, and the order will be priced at the Fund's current NAV per share next determined after such acceptance. Participating insurance companies may have different requirements regarding what constitutes proper form for trade instructions. Please contact the participating insurance company for more information.

Shares of the Fund are only registered for sale in the United States and certain of its territories. Generally, shares of the Fund will only be offered or sold to "U.S. persons" and all offerings or other solicitation activities will be conducted within the United States in accordance with the rules and regulations of the Securities Act of 1933, as amended.

Orders received by the Trust are only processed on business days. The separate accounts purchase and redeem shares of the Fund at the Fund's NAV per share calculated as of the day an order is received by the insurance company although such purchases and redemptions may be executed the next morning. Redemption proceeds paid by wire transfer will normally be wired in federal funds on the business day on which the Trust receives actual notice of the redemption order, but may be paid up to two business days after receipt of actual notice of the order.

The Fund typically expects to meet redemption requests by using holdings of cash or cash equivalents and/or proceeds from the sale of portfolio holdings. In addition, under stressed market conditions, as well as for other temporary or emergency purposes, the Fund may distribute redemption proceeds in-kind (instead of cash), access a line of credit or overdraft facility, or borrow through other sources to meet redemption requests.

Notwithstanding the foregoing, the Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders.

What Types Of Reports Will I Be Sent Regarding Investments In The Fund?

As a holder of a variable annuity contract or variable life insurance policy, you will receive annual shareholder reports containing audited financial statements and semi-annual shareholder reports from your participating insurance company.

What Are The Fund's Voting Procedures?

Participating insurance companies, not the owners of the variable annuity contracts or variable life insurance policies or participants therein, are shareholders of the Fund. To the extent required by law:

- The participating insurance companies will vote Fund shares held in the separate accounts in a manner consistent with timely voting instructions received from the holders of variable annuity contracts and variable life insurance policies.

- The participating insurance companies will vote Fund shares held in the separate accounts for which no timely instructions are received from the holders of variable annuity contracts and variable life insurance policies, as well as shares they own, in the same proportion as those shares for which voting instructions are received.

It is anticipated that Fund shares held by unregistered separate accounts or qualified plans generally will be voted for or against any proposition in the same proportion as all other Fund shares are voted unless the unregistered separate account's participating insurance company or the plan makes other arrangements.

Additional information concerning voting rights of the participants in the separate accounts is more fully set forth in the prospectus relating to those accounts issued by the participating insurance companies.

RESTRICTIONS ON EXCESSIVE TRADING PRACTICES

Policies and Procedures on Excessive Trading Practices. In accordance with the policy adopted by the Board of Trustees, the Trust discourages frequent purchases and redemptions of Fund shares and does not permit market timing or other excessive trading practices. Purchases and exchanges should be made with a view to longer-term investment purposes only that are consistent with the investment policies and practices of the Fund. Excessive, short-term (market timing) trading practices may disrupt portfolio management strategies, increase brokerage and administrative costs, harm Fund performance and result in dilution in the value of Fund shares held by longer-term shareholders. The Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any participating insurance company or other investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders. To minimize harm to the Trust and its shareholders (or Goldman Sachs), the Trust (or Goldman Sachs) will exercise this right if, in the Trust's (or Goldman Sachs') judgment, an investor has a history of excessive trading or if an investor's trading, in the judgment of the Trust (or Goldman Sachs), has been or may be disruptive to the Fund. In making this judgment, trades executed in multiple accounts under common ownership or control may be considered together to the extent they can be identified. No waivers of the provisions of the policy established to detect and deter market timing and other excessive trading activity are permitted that would harm the Trust or its shareholders or would subordinate the interests of the Trust or its shareholders to those of Goldman Sachs or any affiliated person or associated person of Goldman Sachs.

As a deterrent to excessive trading, many foreign equity securities held by the Goldman Sachs Funds are priced by an independent pricing service using fair valuation. For more information on fair valuation, please see "How Are Shares Priced?"

Pursuant to the policy adopted by the Board of Trustees of the Trust, Goldman Sachs has developed criteria that it uses to identify trading activity that may be excessive. Excessive trading activity in the Fund is measured by the number of "round trip" transactions in a shareholder's account. A "round trip" includes a purchase or exchange into a Fund followed or preceded by a redemption or exchange out of the same Fund. If a Fund detects that a shareholder has completed two or more round trip transactions in a single Fund within a rolling 90-day period, the Fund may reject or restrict subsequent purchase or exchange orders by that shareholder permanently. In addition, a Fund may, in its sole discretion, permanently reject or restrict purchase or exchange orders by a shareholder if the Fund detects other trading activity that is deemed to be disruptive to the management of the Fund or otherwise harmful to the Fund. For purposes of these transaction surveillance procedures, the Fund may consider trading activity in multiple accounts under common ownership, control, or influence. A shareholder that has been restricted from participation in a Fund pursuant to this policy will be allowed to apply for reentry after one year. A shareholder applying for re-entry must provide assurances acceptable to the Fund that the shareholder will not engage in excessive trading activities in the future.

Goldman Sachs may modify its surveillance procedures and criteria from time to time without prior notice regarding the detection of excessive trading or to address specific circumstances. Goldman Sachs will apply the criteria in a manner that, in Goldman Sachs' judgment, will be uniform.

Fund shares are generally held through omnibus arrangements maintained by participating insurance companies or other intermediaries. Omnibus accounts include multiple investors and such accounts typically provide the Fund with a net purchase or redemption request on any given day where the purchases and redemptions of Fund shares by the investors shares are netted against one another. The identity of individual investors whose purchase and redemption orders are aggregated are ordinarily not tracked by the Fund on a regular basis. A number of these insurance companies or financial intermediaries may not have the capability or may not be willing or legally able to apply the Fund's market timing policies. While Goldman Sachs may monitor share turnover at the omnibus account level, the Fund's ability to monitor and detect market timing by investors in these omnibus accounts may be limited in certain circumstances, and certain of these insurance companies or financial intermediaries may charge the Fund a fee for providing certain shareholder financial information requested as part of the Fund's surveillance process. The netting effect makes it more difficult to identify, locate and eliminate market timing activities. In addition, those investors who engage in market timing and other excessive trading activities may employ a variety of techniques to avoid detection. There can be no assurance that the Fund and Goldman Sachs will be able to identify all those who trade excessively or employ a market timing strategy, and curtail their trading in every instance. If necessary, the Trust may prohibit additional purchases of Fund shares by a participating insurance company or intermediary or by certain of their customers. Insurance companies and intermediaries may also monitor their customers' trading activities in the Fund.

The criteria used by insurance companies or intermediaries to monitor for excessive trading may differ from the criteria used by the Fund. If an insurance company or intermediary fails to cooperate in the implementation or enforcement of the Trust's excessive trading policies, the Trust may take certain actions including terminating the relationship.

Taxation

The Fund is treated as a separate corporate entity for federal tax purposes. The Fund has elected to be treated as a regulated investment company and intends to qualify for such treatment for each taxable year under Subchapter M of Subtitle A, Chapter 1 of the Internal Revenue Code of 1986, as amended (the “Code”). In addition, the Fund intends to qualify under the Code with respect to the diversification requirements related to variable contracts. Provided that the Fund and a separate account investing in the Fund satisfy applicable tax requirements, the Fund will not be subject to federal tax and any distributions from the Fund to the separate account will be exempt from current federal income taxation to the extent that such distributions accumulate in a variable annuity contract or a variable life insurance contract.

Persons investing in variable annuity or variable life insurance contracts should refer to the prospectuses with respect to such contracts for further information regarding the tax treatment of the contracts and the separate accounts in which the contracts are invested.

Appendix A

Additional Information on Portfolio Risks, Securities and Techniques

A. GENERAL PORTFOLIO RISKS

Because the Fund invests in derivatives that provide exposure to equity investments, the Fund will be subject to the risks associated with such investments. “Equity investments” may include common stocks, preferred stocks, warrants, stock purchase rights, interests in REITs, equity interests in trusts, partnerships, joint ventures, limited liability companies and similar enterprises, MLPs, other investment companies (including ETFs) and synthetic and derivative instruments (such as swaps and futures contracts) that have economic characteristics similar to equity securities. In general, the values of equity investments fluctuate in response to the activities of individual companies and in response to general market and economic conditions. Accordingly, the values of such investments may decline over short or extended periods. The stock markets tend to be cyclical, with periods when stock prices generally rise and periods when prices generally decline. This volatility means that the value of your investment in the Fund may increase or decrease. In recent years, certain stock markets have experienced substantial price volatility. To the extent the Fund’s net assets decrease or increase in the future due to price volatility or share redemption or purchase activity, the Fund’s expense ratio may correspondingly increase or decrease from the expense ratio disclosed in this Prospectus.

To the extent the Fund invests in pooled investment vehicles (including investment companies and ETFs), partnerships and REITs, the Fund will be affected by the investment policies, practices and performance of such entities in direct proportion to the amount of assets the Fund invests therein.

To the extent it invests in fixed income securities, the Fund will also be subject to the risks associated with fixed income securities. These risks include interest rate risk and credit/default risk. In general, interest rate risk involves the risk that when interest rates decline, the market value of fixed income securities tends to increase. Conversely, when interest rates increase, the market value of fixed income securities tends to decline. Credit/default risk involves the risk that an issuer or guarantor could default on its obligations, and the Fund will not recover its investment.

A rising interest rate environment could cause the value of the Fund’s fixed income securities to decrease, and fixed income markets to experience increased volatility in addition to heightened levels of liquidity risk. Additionally, decreases in the value of fixed income securities could lead to increased shareholder redemptions, which could impair the Fund’s ability to achieve its investment objective. The risks associated with increasing interest rates are heightened given that interest rates are near historic lows, but may be expected to increase in the future with unpredictable effects on the markets and the Fund’s investments.

The Fund may invest in non-investment grade fixed income securities (commonly known as “junk bonds”), which are rated below investment grade (or determined to be of comparable credit quality, if not rated) at the time of purchase and are therefore considered speculative. Because non-investment grade fixed income securities are issued by issuers with low credit ratings, they pose a greater risk of default than investment grade securities.

The Investment Adviser may use derivative instruments, including financial futures contracts and swap transactions, as well as other types of derivatives. The Fund’s investments in derivative instruments, including financial futures contracts and swaps, can be significant.

Interest rates, fixed income securities prices, the prices of futures and other derivatives, and currency exchange rates can be volatile, and a variance in the degree of volatility or in the direction of the market from the Investment Adviser’s expectations may produce significant losses in the Fund’s investments in derivatives.

Financial futures contracts used by the Fund include interest rate futures contracts including, among others, Eurodollar futures contracts. Eurodollar futures contracts are U.S. dollar-denominated futures contracts that are based on the implied forward London Interbank Offered Rate (LIBOR) of a three-month deposit. Further information is included in this Prospectus regarding futures contracts, swaps and other derivative instruments used by the Fund, including information on the risks presented by these instruments and purposes for which they may be used by the Fund.

The Investment Adviser will not consider the portfolio turnover rate a limiting factor in making investment decisions for the Fund. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which must be borne by the Fund and its shareholders. The portfolio turnover rate is calculated by dividing the lesser of the dollar amount of sales or purchases of portfolio securities by the average monthly value of the Fund’s portfolio securities, excluding securities having a maturity at the date of purchase of one year or less. See “Financial Highlights” in Appendix B for a statement of the Fund’s historical portfolio turnover rates.

The Fund may, from time to time, enter into arrangements with certain brokers or other counterparties that require the segregation of collateral. For operational, cost or other reasons, when setting up arrangements relating to the execution/clearing of trades, the Fund may choose to select a segregation model which may not be the most protective option available in the case of a default by a broker or counterparty.

The following sections provide further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks. Additional information is provided in the SAI, which is available upon request. Among other things, the SAI describes certain fundamental investment restrictions that cannot be changed without shareholder approval. You should note, however, that all investment objectives, and all investment policies not specifically designated as fundamental are non-fundamental and may be changed without shareholder approval. If there is a change in the Fund's investment objective, you should consider whether the Fund remains an appropriate investment in light of your then current financial position and needs.

B. OTHER PORTFOLIO RISKS

Principal Risks of the Fund

Risks of Derivative Investments. The Fund may, to the extent consistent with its investment policies, invest in derivative instruments, including without limitation, options, futures, options on futures, forward contracts, swaps, structured securities and other derivative instruments. Derivatives may be used for both hedging and nonhedging purposes (that is, to seek to increase total return), although suitable derivative instruments may not always be available to the Investment Adviser for these purposes. Losses from derivative instruments can result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged, the potential illiquidity of the markets for derivative instruments, the failure of the counterparty to perform its contractual obligations, or the risks related to leverage factors associated with such transactions. Derivatives are also subject to risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivatives positions and the risk of loss by the Fund of margin deposits in the event of the bankruptcy or other similar insolvency with respect to a broker or counterparty with whom the Fund has an open derivative position. Losses may also arise if the Fund receives cash collateral under the transactions and some or all of that collateral is invested in the market. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund may be responsible for any loss that might result from its investment of the counterparty's cash collateral. If cash collateral is not invested, the Fund may be exposed to additional risk of loss in the event of the insolvency of its custodian holding such collateral. The use of these management techniques also involves the risk of loss if the Investment Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates, currency prices or other variables. Investments in derivative instruments may be harder to value, subject to greater volatility and more likely subject to changes in tax treatment than other investments. For these reasons, the Investment Adviser's attempts to hedge portfolio risks through the use of derivative instruments may not be successful, and the Investment Adviser may choose not to hedge portfolio risks. Using derivatives for nonhedging purposes presents greater risk of loss than derivatives used for hedging purposes.

Risks of Illiquid Investments. The Fund may not acquire any "illiquid investment" if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An "illiquid investment" is an investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. In determining whether an investment is an illiquid investment, the Investment Adviser will take into account actual or estimated daily transaction volume of an investment, group of related investments or asset class and other relevant market, trading, and investment-specific considerations. In addition, in determining the liquidity of an investment, the Investment Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Fund must take this determination into account when classifying the liquidity of that investment or asset class.

Investments purchased by the Fund that are liquid at the time of purchase may subsequently become illiquid. If one or more investments in the Fund's portfolio become illiquid, the Fund may exceed the 15% limitation in illiquid investments. In the event that changes in the portfolio or other external events cause the Fund to exceed this limit, the Fund must take steps to bring its illiquid investments that are assets to or below 15% of its net assets within a reasonable period of time. This requirement would not force the Fund to liquidate any portfolio instrument where the Fund would suffer a loss on the sale of that instrument.

In cases where no clear indication of the value of the Fund's portfolio instruments is available, the portfolio instruments will be valued at their fair value according to the valuation procedures approved by the Board of Trustees. These cases include, among others, situations where a security or other asset or liability does not have a price source, or the secondary markets on which an investment has previously been traded are no longer viable, due to its lack of liquidity. For more information on fair valuation, please see "Shareholder Guide—How Are Shares Priced?"

Credit/Default Risks. Debt securities purchased by the Fund may include U.S. Government Securities (including zero coupon bonds) and securities issued by foreign governments, domestic and foreign corporations, banks and other issuers. Some of these fixed income securities are described in the next section below. Further information is provided in the SAI.

The Fund also has credit rating requirements for the securities it buys, which are applied at the time of purchase. For this purpose, the Fund relies only on the ratings of the following NRSROs: Standard & Poor's, Moody's and Fitch, Inc.

Unrated securities may be purchased by the Fund if they are determined by the Investment Adviser to be of a credit quality consistent with the Fund's credit rating requirements.

Debt securities rated BBB- or higher by Standard & Poor's or Baa3 or higher by Moody's or having a comparable credit rating by another NRSRO are considered "investment grade." Securities rated BBB- or Baa3 are considered medium-grade obligations with speculative characteristics, and adverse economic conditions or changing circumstances may weaken the issuers' capacity to pay interest and repay principal. For the purpose of determining compliance with any credit rating requirement, the Fund assigns a security, at the time of purchase, the highest rating by an NRSRO if the security is rated by more than one NRSRO. Therefore, a security will be deemed to have met a rating requirement if it receives the minimum required rating from at least one such rating organization even though it has been rated below the minimum rating by one or more other rating organizations, or if unrated by such rating organizations, the security is determined by the Investment Adviser to be of comparable credit quality. A security satisfies the Fund's minimum rating requirement regardless of its relative ranking (for example, plus or minus) within a designated major rating category (for example, BBB or Baa). If a security satisfies the Fund's minimum rating requirement at the time of purchase and is subsequently downgraded below that rating, the Fund will not be required to dispose of the security. If a downgrade occurs, the Investment Adviser will consider what action, including the sale of the security, is in the best interest of the Fund and its shareholders.

The Fund may invest in fixed income securities rated BB+ or Ba1 or below (or comparable unrated securities) which are commonly referred to as "junk bonds." Junk bonds are considered speculative and may be questionable as to principal and interest payments.

In some cases, junk bonds may be highly speculative, have poor prospects for reaching investment grade standing and be in default. As a result, investment in such bonds will present greater speculative risks than those associated with investment in investment grade bonds. Also, to the extent that the rating assigned to a security in the Fund's portfolio is downgraded by a rating organization, the market price and liquidity of such security may be adversely affected.

Risks of Foreign Investments. The Fund will make foreign investments. Foreign investments involve special risks that are not typically associated with U.S. dollar denominated or quoted securities of U.S. issuers. Foreign investments may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and changes in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. In addition, if the currency in which the Fund receives dividends, interest or other payments declines in value against the U.S. dollar before such income is distributed as dividends to shareholders or converted to U.S. dollars, the Fund may have to sell portfolio securities to obtain sufficient cash to pay such dividends.

Certain foreign markets may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against foreign countries, organizations, entities and/or individuals may adversely affect the Fund's foreign holdings or exposures.

Brokerage commissions, custodial services and other costs relating to investment in international securities markets generally are more expensive than in the United States. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign issuers are not generally subject to uniform accounting, auditing and financial reporting standards comparable to those applicable to U.S. issuers. There may be less publicly available information about a foreign issuer than about a U.S. issuer. In addition, there is generally less government regulation of foreign markets, companies and securities dealers than in the United States, and the legal remedies for investors may be more limited than the remedies available in the United States. Foreign securities markets may have substantially less volume than U.S. securities markets and securities of many foreign issuers are less liquid and more volatile than securities of comparable domestic issuers. Furthermore, with respect to certain foreign countries, there is a possibility of nationalization, expropriation or confiscatory taxation, imposition of withholding or other taxes on dividend or interest payments (or, in some cases, capital gains distributions), limitations on the removal of funds or other assets from such countries, and risks of political or social instability or diplomatic developments which could adversely affect investments in those countries.

Certain foreign investments may become less liquid in response to social, political or market developments or adverse investor perceptions, or become illiquid after purchase by the Fund, particularly during periods of market turmoil. Certain foreign investments may become illiquid when, for instance, there are few, if any, interested buyers and sellers or when dealers are unwilling to make a market for certain securities. When the Fund holds illiquid investments, its portfolio may be harder to value, especially in changing markets.

The Fund may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Fund's ability to recover assets if a Foreign Custodian enters bankruptcy. Investments in emerging market countries may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

If the Fund focuses its investments in one or a few countries and currencies it will subject the Fund to greater risks than if the Fund's assets were not geographically focused.

Investments in foreign securities may take the form of sponsored and unsponsored American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs") or other similar instruments representing securities of foreign issuers. ADRs, EDRs and GDRs represent the right to receive securities of foreign issuers deposited in a bank or other depository. ADRs and certain GDRs are traded in the United States. GDRs may be traded in either the United States or in foreign markets. EDRs are traded primarily outside of the United States. Prices of ADRs are quoted in U.S. dollars. EDRs and GDRs are not necessarily quoted in the same currency as the underlying security.

Risks of Emerging Countries. The Fund may invest in securities of issuers located in, or otherwise economically tied to, emerging countries. The risks of foreign investment are heightened when the issuer is located in an emerging country. Emerging countries are generally located in Africa, Asia, the Middle East, Eastern and Central Europe, and Central and South America. The Fund's purchase and sale of portfolio securities in certain emerging countries may be constrained by limitations relating to daily changes in the prices of listed securities, periodic trading or settlement volume and/or limitations on aggregate holdings of foreign investors. Such limitations may be computed based on the aggregate trading volume by or holdings of the Fund, the Investment Adviser, its affiliates and their respective clients and other service providers. The Fund may not be able to sell securities in circumstances where price, trading or settlement volume limitations have been reached.

Foreign investment in the securities markets of certain emerging countries is restricted or controlled to varying degrees which may limit investment in such countries or increase the administrative costs of such investments. For example, certain Asian countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the issuer available for purchase by nationals. In addition, certain countries may restrict or prohibit investment opportunities in issuers or industries deemed important to national interests. Such restrictions may affect the market price, liquidity and rights of securities that may be purchased by the Fund. The repatriation of investment income, capital or the proceeds of securities sales from certain emerging countries is subject to restrictions such as the need for governmental consents, which may make it difficult for the Fund to invest in such emerging countries. The Fund could be adversely affected by delays in, or a refusal to grant, any required governmental approval for such repatriation. In situations where a country restricts direct investment in securities (which may occur in certain Asian and other countries), the Fund may invest in such countries through other investment funds in such countries.

Emerging market countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. The degree of cooperation between issuers in emerging and frontier market countries with foreign and U.S. financial regulators may vary significantly. Accordingly, regulators may not have sufficient access to audit and oversee issuers, and there could be less information available about issuers in certain emerging market countries. As a result, the Investment Adviser's ability to evaluate local companies or their potential impact on the Fund's performance could be inhibited.

Many emerging countries have experienced currency devaluations and substantial (and, in some cases, extremely high) rates of inflation. Other emerging countries have experienced economic recessions. These circumstances have had a negative effect on the economies and securities markets of such emerging countries. Economies in emerging countries generally are dependent heavily upon commodity prices and international trade and, accordingly, have been and may continue to be affected adversely by the economies of their trading partners, trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade.

Many emerging countries are subject to a substantial degree of economic, political and social instability. Governments of some emerging countries are authoritarian in nature or have been installed or removed as a result of military coups, while governments in other emerging countries have periodically used force to suppress civil dissent. Disparities of wealth, the pace and success of democratization, and ethnic, religious and racial disaffection, among other factors, have also led to social unrest, violence and/or labor unrest in some emerging countries. Unanticipated political or social developments may result in sudden and significant investment losses. Investing in emerging countries involves greater risk of loss due to expropriation, nationalization, confiscation of assets and property or the imposition of restrictions on foreign investments and on repatriation of capital invested. As an example, in the past some Eastern European governments have expropriated substantial amounts of private property, and many claims of the property owners have never been fully settled. There is no assurance that similar expropriations will not occur in other countries.

The Fund's investment in emerging countries may also be subject to withholding or other taxes, which may be significant and may reduce the return to the Fund from an investment in issuers in such countries.

Settlement procedures in emerging countries are frequently less developed and reliable than those in the United States and may involve the Fund's delivery of securities before receipt of payment for their sale. In addition, significant delays may occur in certain markets in registering the transfer of securities. Settlement or registration problems may make it more difficult for the Fund to value its portfolio securities and could cause the Fund to miss attractive investment opportunities, to have a portion of its assets uninvested or to incur losses due to the failure of a counter-party to pay for securities the Fund has delivered or the Fund's inability to complete its contractual obligations because of theft or other reasons.

The creditworthiness of the local securities firms used by the Fund in emerging countries may not be as sound as the creditworthiness of firms used in more developed countries. As a result, the Fund may be subject to a greater risk of loss if a securities firm defaults in the performance of its responsibilities.

The small size and inexperience of the securities markets in certain emerging countries and the limited volume of trading in securities in those countries may make the Fund's investments in such countries less liquid and more volatile than investments in countries with more developed securities markets (such as the United States, Japan and most Western European countries). The Fund's investments in emerging countries are subject to the risk that the liquidity of a particular investment, or investments generally, in such countries will shrink or disappear suddenly and without warning as a result of adverse economic, market or political conditions or adverse investor perceptions, whether or not accurate. Because of the lack of sufficient market liquidity, the Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Investments in emerging countries may be more difficult to value precisely because of the characteristics discussed above and lower trading volumes.

The Fund's use of foreign currency management techniques in emerging countries may be limited. The Investment Adviser anticipates that all or a significant portion of the Fund's currency exposure in emerging countries may not be covered by those techniques.

Risks of Sovereign Debt. Investment in sovereign debt obligations by the Fund involves risks not present in debt obligations of corporate issuers. The issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or pay interest when due in accordance with the terms of such debt, and the Fund may have limited recourse to compel payment in the event of a default. Periods of economic uncertainty may result in the volatility of market prices of sovereign debt, and in turn the Fund's NAV, to a greater extent than the volatility inherent in debt obligations of U.S. issuers.

A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor's policy toward international lenders, and the political constraints to which a sovereign debtor may be subject.

Risks of Investing in Mid-Capitalization and Small-Capitalization Companies and REITs. The Fund may invest in mid- and small-capitalization companies and REITs. Investments in mid- and small-capitalization companies and REITs involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Among the reasons for the greater price volatility of these investments are the less certain growth prospects of smaller firms and the lower degree of liquidity in the markets for such securities. Mid- and small-capitalization companies and REITs may be thinly traded and may have to be sold at a discount from current market prices or in small lots over an extended period of time. In addition, these securities are subject to the risk that during certain periods the liquidity of particular issuers or industries, or all securities in particular investment categories, will shrink or disappear suddenly and without warning as a result of adverse economic or market conditions, or adverse investor perceptions whether or not accurate. Because of the lack of sufficient market liquidity, the Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Mid- and small-capitalization companies and REITs include "unseasoned" issuers that do not have an established financial history; often have limited product lines, markets or financial resources; may depend on or use a few key personnel for management; and may be susceptible to losses and risks of bankruptcy. Mid- and small-capitalization companies may be operating at a loss or have significant variations in operating results; may be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence; may require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; and may have substantial borrowings or may

otherwise have a weak financial condition. In addition, these companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing, and other capabilities, and a larger number of qualified managerial and technical personnel. Transaction costs for these investments are often higher than those of larger capitalization companies. Investments in mid- and small-capitalization companies and REITs may be more difficult to price precisely than other types of securities because of their characteristics and lower trading volumes.

C. PORTFOLIO SECURITIES AND TECHNIQUES

This section provides further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks.

The Fund may purchase other types of securities or instruments similar to those described in this section if otherwise consistent with the Fund's investment objective and policies. Further information is provided in the SAI, which is available upon request.

The Investment Adviser is subject to registration and regulation as a "commodity pool operator" ("CPO") under the Commodity Exchange Act ("CEA") with respect to its service as an investment adviser to the Fund.

U.S. Government Securities. The Fund may invest in U.S. Government Securities. U.S. Government Securities include U.S. Treasury obligations and obligations issued or guaranteed by U.S. government agencies, instrumentalities or sponsored enterprises. U.S. Government Securities may be supported by (i) the full faith and credit of the U.S. Treasury; (ii) the right of the issuer to borrow from the U.S. Treasury; (iii) the discretionary authority of the U.S. government to purchase certain obligations of the issuer; or (iv) only the credit of the issuer. U.S. Government Securities also include Treasury receipts, zero coupon bonds and other stripped U.S. Government Securities, where the interest and principal components are traded independently. U.S. Government Securities may also include Treasury inflation-protected securities whose principal value is periodically adjusted according to the rate of inflation.

U.S. Government Securities are deemed to include (i) securities for which the payment of principal and interest is backed by an irrevocable letter of credit issued by the U.S. government, its agencies, authorities or instrumentalities; and (ii) participations in loans made to foreign governments or their agencies that are so guaranteed. Certain of these participations may be regarded as illiquid.

U.S. Treasury Securities have historically involved little risk of loss of principal if held to maturity. However, no assurance can be given that loss of principal will not occur or that the U.S. government will be able or willing to repay the principal or interest when due or will provide financial support to U.S. government agencies, authorities, instrumentalities or sponsored enterprises that issue U.S. Government Securities if it is not obligated to do so by law.

Custodial Receipts and Trust Certificates. The Fund may invest in custodial receipts and trust certificates representing interests in securities held by a custodian or trustee. The securities so held may include U.S. Government Securities or other types of securities in which the Fund may invest. The custodial receipts or trust certificates may evidence ownership of future interest payments, principal payments or both on the underlying securities, or, in some cases, the payment obligation of a third party that has entered into an interest rate swap or other arrangement with the custodian or trustee. For certain securities laws purposes, custodial receipts and trust certificates may not be considered obligations of the U.S. government or other issuer of the securities held by the custodian or trustee. If for tax purposes, the Fund is not considered to be the owner of the underlying securities held in the custodial or trust account, the Fund may suffer adverse tax consequences. As a holder of custodial receipts and trust certificates, the Fund will bear its proportionate share of the fees and expenses charged to the custodial account or trust. The Fund may also invest in separately issued interests in custodial receipts and trust certificates.

REITs. The Fund may invest in REITs. REITs are pooled investment vehicles that invest primarily in either real estate or real estate related loans. The value of a REIT is affected by changes in the value of the properties owned by the REIT or securing mortgage loans held by the REIT. REITs are dependent upon the ability of the REITs' managers, and are subject to heavy cash flow dependency, default by borrowers and the qualification of the REITs under applicable regulatory requirements for favorable income tax treatment. REITs are also subject to risks generally associated with investments in real estate including possible declines in the value of real estate, general and local economic conditions, environmental problems and changes in interest rates. To the extent that assets underlying a REIT are concentrated geographically, by property type or in certain other respects, these risks may be heightened. The Fund will indirectly bear its proportionate share of any expenses, including management fees, paid by a REIT in which it invests.

Preferred Stock, Warrants and Stock Purchase Rights. Preferred stocks are securities that represent an ownership interest providing the holder with claims on the issuer's earnings and assets before common stock owners but after bond owners. Unlike debt securities, the obligations of an issuer of preferred stock, including dividend and other payment obligations, may not typically be accelerated by the holders of such preferred stock on the occurrence of an event of default or other non-compliance by the issuer of the preferred stock.

Warrants and other rights are options to buy a stated number of shares of common stock at a specified price at any time during the life of the warrant or right. The holders of warrants and rights have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Zero Coupon, Deferred Interest, Pay-In-Kind and Capital Appreciation Bonds. The Fund may invest in zero coupon bonds, deferred interest, pay-in-kind and capital appreciation bonds. These bonds are issued at a discount from their face value because interest payments are typically postponed until maturity. Pay-in-kind securities are securities that have interest payable by the delivery of additional securities. The market prices of these securities generally are more volatile than the market prices of interest-bearing securities and are likely to respond to a greater degree to changes in interest rates than interest-bearing securities having similar maturities and credit quality.

Structured Securities. The Fund may invest in structured securities. Structured securities are securities whose value is determined by reference to changes in the value of specific currencies, securities, interest rates, commodities, indices or other financial indicators (the “Reference”) or the relative change in two or more References. Investments in structured securities may provide exposure to certain securities or markets in situations where regulatory or other restrictions prevent direct investments in such issuers or markets.

The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. Structured securities may be positively or negatively indexed, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, changes in the interest rates or the value of the security at maturity may be a multiple of changes in the value of the Reference, effectively leveraging the Fund’s investments so that small changes in the value of the Reference may result in disproportionate gains or losses to the Fund.

Consequently, structured securities may present a greater degree of market risk than many types of securities and may be more volatile, less liquid and more difficult to price accurately than less complex securities. Structured securities are also subject to the risk that the issuer of the structured securities may fail to perform its contractual obligations. Certain issuers of structured products may be deemed to be investment companies as defined in the Investment Company Act. As a result, the Fund’s investments in structured securities may be subject to the limits applicable to investments in other investment companies.

Structured securities are considered hybrid instruments because they are derivative instruments the value of which depends on, or is derived from or linked to, the value of an underlying asset, interest rate index or commodity. Commodity-linked notes are hybrid instruments because the principal and/or interest payments on those notes is linked to the value of the individual commodities, futures contracts or the performance of one or more commodity indices.

Structured securities include, but are not limited to, equity linked notes. An equity linked note is a note whose performance is tied to a single stock, a stock index or a basket of stocks. Equity linked notes combine the principal protection normally associated with fixed income investments with the potential for capital appreciation normally associated with equity investments. Upon the maturity of the note, the holder generally receives a return of principal based on the capital appreciation of the linked securities. Depending on the terms of the note, equity linked notes may also have a “cap” or “floor” on the maximum principal amount to be repaid to holders, irrespective of the performance of the underlying linked securities. For example, a note may guarantee the repayment of the original principal amount invested (even if the underlying linked securities have negative performance during the note’s term), but may cap the maximum payment at maturity at a certain percentage of the issuance price or the return of the underlying linked securities.

Alternatively, the note may not guarantee a full return on the original principal, but may offer a greater participation in any capital appreciation of the underlying linked securities. The terms of an equity linked note may also provide for periodic interest payments to holders at either a fixed or floating rate. The secondary market for equity linked notes may be limited, and the lack of liquidity in the secondary market may make these securities difficult to dispose of and to value. Equity linked notes will be considered equity securities for purposes of the Fund’s investment objective and policies.

Foreign Currency Transactions. The Fund may, to the extent consistent with its investment policies, purchase or sell foreign currencies on a cash basis or through forward contracts. A forward contract involves an obligation to purchase or sell a specific currency at a future date at a price set at the time of the contract.

The Fund may engage in foreign currency transactions for hedging purposes and to seek to protect against anticipated changes in future foreign currency exchange rates. In addition, the Fund may enter into foreign currency transactions to seek a closer correlation between the Fund’s overall currency exposures and the currency exposures of the Fund’s performance benchmark. The Fund may also enter into such transactions to seek to increase total return, which is considered a speculative practice.

The Fund may also engage in cross-hedging by using forward contracts in a currency different from that in which the hedged security is denominated or quoted. The Fund may hold foreign currency received in connection with investments in foreign securities when, in the judgment of the Investment Adviser, it would be beneficial to convert such currency into U.S. dollars at a later date (e.g., the Investment Adviser may anticipate that the foreign currency will appreciate against the U.S. dollar).

The Fund may, from time to time, engage in non-deliverable forward transactions to manage currency risk or to gain exposure to a currency without purchasing securities denominated in that currency. A non-deliverable forward is a transaction that represents an agreement between the Fund and a counterparty (usually a commercial bank) to pay the other party the amount that it would cost based on current market rates as of the termination date to buy or sell a specified (notional) amount of a particular currency at an agreed upon foreign exchange rate on an agreed upon future date. If the counterparty defaults, the Fund will have contractual remedies pursuant to the agreement related to the transaction, but the Fund may be delayed or prevented from obtaining payments owed to it pursuant to non-deliverable forward transactions. Such non-deliverable forward transactions will be settled in cash.

Currency exchange rates may fluctuate significantly over short periods of time causing, along with other factors, the Fund's NAV to fluctuate (when the Fund's NAV fluctuates, the value of your shares may go up or down). Currency exchange rates also can be affected unpredictably by the intervention of U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad.

Certain forward foreign currency exchange contracts and other currency transactions are not exchange traded or cleared. The market in such forward foreign currency exchange contracts, currency swaps and other privately negotiated currency instruments offers less protection against defaults by the other party to such instruments than is available for currency instruments traded on an exchange. Such contracts are subject to the risk that the counterparty to the contract will default on its obligations. Because these contracts are not guaranteed by an exchange or clearing-house, a default on a contract would deprive the Fund of unrealized profits, transaction costs or the benefits of a currency hedge or could force the Fund to cover its purchase or sale commitments, if any, at the current market price.

The Fund is not required to post cash collateral with its counterparties in certain foreign currency transactions. Accordingly, the Fund may remain more fully invested (and more of the Fund's assets may be subject to investment and market risk) than if it were required to post collateral with its counterparties (which is the case with certain transactions). Where the Fund's counterparties are not required to post cash collateral with the Fund, the Fund will be subject to additional counterparty risk.

Options on Securities, Securities Indices and Foreign Currencies. A put option gives the purchaser of the option the right to sell, and the writer (seller) of the option the obligation to buy, the underlying instrument during the option period. A call option gives the purchaser of the option the right to buy, and the writer (seller) of the option the obligation to sell, the underlying instrument during the option period. The Fund may write (sell) call and put options and purchase put and call options on any securities and other instruments in which the Fund may invest or any index consisting of securities or other instruments in which it may invest. The Fund may also, to the extent consistent with its investment policies, purchase and write (sell) put and call options on foreign currencies.

The writing and purchase of options is a highly specialized activity which involves special investment risks. Options may be used for either hedging or cross-hedging purposes, or to seek to increase total return (which presents additional risk). The successful use of options depends in part on the ability of the Investment Adviser to anticipate future price fluctuations and the degree of correlation between the options and securities (or currency) markets. If the Investment Adviser is incorrect in its expectation of changes in market prices or determination of the correlation between the instruments or indices on which options are written and purchased and the instruments in the Fund's investment portfolio, the Fund may incur losses that it would not otherwise incur. The use of options can also increase the Fund's transaction costs. Options written or purchased by the Fund may be traded on either U.S. or foreign exchanges or over-the-counter. Foreign and over-the-counter options will present greater possibility of loss because of their greater illiquidity and credit risks.

Futures Contracts and Options and Swaps on Futures Contracts. Futures contracts are standardized, exchange-traded contracts that provide for the sale or purchase of a specified financial instrument or currency at a future time at a specified price. An option on a futures contract gives the purchaser the right (and the writer of the option the obligation) to assume a position in a futures contract at a specified exercise price within a specified period of time. A swap on a futures contract provides an investor with the ability to gain economic exposure to a particular futures market; however, unlike a futures contract that is exchange traded, a swap on a futures contract is an over-the-counter transaction. A futures contract may be based on particular securities, foreign currencies, securities indices and other financial instruments and indices. The Fund may engage in futures transactions on both U.S. and foreign exchanges.

The Fund may purchase and sell futures contracts, purchase and write call and put options on futures contracts, and enter into swaps on futures contracts, in order to seek to increase total return or to hedge against changes in interest rates, securities prices or currency exchange rates, or to otherwise manage its term structure, sector selection and duration in accordance with its investment objective and policies. The Fund may also enter into closing purchase and sale transactions with respect to such contracts and options.

Futures contracts and related options and swaps present the following risks:

- While the Fund may benefit from the use of futures and options and swaps on futures, unanticipated changes in interest rates, securities prices or currency exchange rates may result in a poorer overall performance than if the Fund had not entered into any futures contracts, options transactions or swaps.

- Because perfect correlation between a futures position and a portfolio position that is intended to be protected is impossible to achieve, the desired protection may not be obtained and the Fund may be exposed to additional risk of loss.
- The loss incurred by the Fund in entering into futures contracts and in writing call options and entering into swaps on futures is potentially unlimited and may exceed the amount of the premium received.
- Futures markets are highly volatile and the use of futures may increase the volatility of the Fund's NAV.
- As a result of the low margin deposits normally required in futures trading, a relatively small price movement in a futures contract may result in substantial losses to the Fund.
- Futures contracts and options and swaps on futures may be illiquid, and exchanges may limit fluctuations in futures contract prices during a single day.
- Foreign exchanges may not provide the same protection as U.S. exchanges.

Other Investment Companies. The Fund may invest in securities of other investment companies, including ETFs and money market funds, subject to statutory limitations prescribed by the Investment Company Act, or exemptive relief or regulations thereunder. These statutory limitations include in certain circumstances a prohibition on the Fund acquiring more than 3% of the voting shares of any other investment company, and a prohibition on investing more than 5% of the Fund's total assets in securities of any one investment company or more than 10% of total assets in securities of all investment companies.

The use of ETFs is generally intended to help the Fund match the total return of the particular market segments or indices represented by those ETFs, although that may not be the result. Most ETFs are passively managed investment companies whose shares are purchased and sold on a securities exchange. An ETF generally represents a portfolio of securities designed to track a particular market segment or index. An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange-traded) that has the same investment objectives, strategies and policies. In addition, an ETF may fail to accurately track the market segment or index that underlies its investment objective. The price of an ETF can fluctuate, and the Fund could lose money investing in an ETF. Moreover, ETFs are subject to the following risks that do not apply to conventional funds: (i) the market price of the ETF's shares may trade at a premium or a discount to their NAV; (ii) an active trading market for an ETF's shares may not develop or be maintained; and (iii) there is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged.

Subject to applicable law and/or pursuant to an exemptive order obtained from the SEC or under an exemptive rule adopted by the SEC, the Fund may invest in certain other investment companies, including ETFs and money market funds, beyond the statutory limits described above or otherwise provided that certain conditions are met. Some of those investment companies may be funds for which the Investment Adviser or any of its affiliates serves as investment adviser, administrator or distributor.

The Fund will indirectly bear its proportionate share of any management fees and other expenses paid by such other investment companies, in addition to the fees and expenses regularly borne by the Fund. Although the Fund does not expect to do so in the foreseeable future, the Fund is authorized to invest substantially all of its assets in a single open-end investment company or series thereof that has substantially the same investment objective, policies and fundamental restrictions as the Fund.

Interest Rate Swaps, Credit Swaps, Currency Swaps, Equity Swaps, Total Return Swaps, Options on Swaps and Interest Rate Caps, Floors and Collars. Interest rate swaps involve the exchange by the Fund with another party of their respective commitments to pay or receive interest, such as an exchange of fixed-rate payments for floating rate payments. Credit swaps involve the receipt of floating or fixed rate payments in exchange for assuming potential credit losses on an underlying security or pool of securities. Credit swaps give one party to a transaction (the buyer of the credit swap) the right to dispose of or acquire an asset (or group of assets or exposure to the performance of an index), or the right to receive a payment from the other party, upon the occurrence of specified credit events. Currency swaps involve the exchange of the parties' respective rights to make or receive payments in specified currencies. Total return swaps give a party the right to receive the appreciation in the value of a specified security, index or other instrument in return for a fee paid to the counterparty, which will typically be based on an agreed upon interest rate. If the underlying asset in a total return swap declines in value over the term of the swap, the party may also be required to pay the dollar value of that decline to the counterparty. The Fund may also purchase and write (sell) options contracts on swaps, commonly referred to as swaptions. A swaption is an option to enter into a swap agreement. Like other types of options, the buyer of a swaption pays a nonrefundable premium for the option and obtains the right, but not the obligation, to enter into an underlying swap or to modify the terms of an existing swap on agreed-upon terms. The seller of a swaption, in exchange for the premium, becomes obligated (if the option is exercised) to enter into or modify an underlying swap on agreed-upon terms, which generally entails a greater risk of loss than the Fund incurs in buying a swaption. Equity swaps allow the parties to a swap agreement to exchange the dividend income or other components of return on an equity investment (for example, a group of equity securities or an index) for another payment stream. An equity swap may be used by the Fund to invest in a market without owning or taking physical custody of securities in circumstances in which direct investment may be restricted for legal reasons or is otherwise deemed impractical or disadvantageous.

The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payment of interest on a notional principal amount from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling the interest rate floor. An interest rate collar is the combination of a cap and a floor that preserves a certain return within a predetermined range of interest rates.

The Fund may enter into swap transactions for hedging purposes or to seek to increase total return. As an example, when the Fund is the buyer of a credit default swap (commonly known as buying protection), it may make periodic payments to the seller of the credit default swap to obtain protection against a credit default on a specified underlying asset (or group of assets). If a default occurs, the seller of a credit default swap may be required to pay the Fund the notional amount of the credit default swap on a specified security (or group of securities). On the other hand, when the Fund is a seller of a credit default swap (commonly known as selling protection), in addition to the credit exposure the Fund has on the other assets held in its portfolio, the Fund is also subject to the credit exposure on the notional amount of the swap since, in the event of a credit default, the Fund may be required to pay the notional amount of the credit default swap on a specified security (or group of securities) to the buyer of the credit default swap. The Fund will be the seller of a credit default swap only when the credit of the underlying asset is deemed by the Investment Adviser to meet the Fund's minimum credit criteria at the time the swap is first entered into.

When the Fund writes (sells) credit swaps on individual securities or instruments, the Fund must identify on its books liquid assets equal to the full notional amount of the swaps while the positions are open.

The use of interest rate, credit, currency, index, total return and equity swaps, options on swaps, and interest rate caps, floors and collars, is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If the Investment Adviser is incorrect in its forecasts of market values, interest rates and currency exchange rates, or in its evaluation of the creditworthiness of swap counterparties and the issuers of the underlying assets, the investment performance of the Fund would be less favorable than it would have been if these investment techniques were not used.

Currently, certain standardized swap transactions are subject to mandatory central clearing and exchange trading. Although central clearing and exchange trading is expected to decrease counterparty risk and increase liquidity compared to bilaterally negotiated swaps, central clearing and exchange trading does not eliminate counterparty risk or illiquidity risk entirely. Depending on the size of the Fund and other factors, the margin required under the rules of a clearinghouse and by a clearing member may be in excess of the collateral required to be posted by the Fund to support its obligations under a similar bilateral, uncleared swap. However, certain applicable regulators have adopted rules imposing certain margin requirements, including minimums, on uncleared swaps which may result in the Fund and its counterparties posting higher amounts for uncleared swaps.

Non-Investment Grade Fixed Income Securities. Non-investment grade fixed-income securities and unrated securities of comparable credit quality (commonly known as "junk bonds") are considered speculative. In some cases, these obligations may be highly speculative and have poor prospects for reaching investment grade standing. Non-investment grade fixed income securities are subject to the increased risk of an issuer's inability to meet principal and interest obligations. These securities, also referred to as high yield securities, may be subject to greater price volatility due to such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond markets generally and less secondary market liquidity.

Non-investment grade fixed income securities are often issued in connection with a corporate reorganization or restructuring or as part of a merger, acquisition, takeover or similar event. They are also issued by less established companies seeking to expand. Such issuers are often highly leveraged and generally less able than more established or less leveraged entities to make scheduled payments of principal and interest in the event of adverse developments or business conditions. Non-investment grade securities are also issued by governmental bodies that may have difficulty in making all scheduled interest and principal payments. The market value of non-investment grade fixed income securities tends to reflect individual government or municipal developments to a greater extent than that of higher rated securities which react primarily to fluctuations in the general level of interest rates. As a result, the Fund's ability to achieve its investment objectives may depend to a greater extent on the Investment Adviser's judgment concerning the creditworthiness of issuers than funds which invest in higher-rated securities. Issuers of non-investment grade fixed income securities may not be able to make use of more traditional methods of financing and their ability to service debt obligations may be affected more adversely than issuers of higher-rated securities by economic downturns, specific corporate or financial developments or the issuer's inability to meet specific projected business forecasts. Negative publicity about the junk bond market and investor perceptions regarding lower rated securities, whether or not based on fundamental analysis, may depress the prices for such securities.

A holder's risk of loss from default is significantly greater for non-investment grade fixed income securities than is the case for holders of other debt securities because such non-investment grade securities are generally unsecured and are often subordinated to the rights of other creditors of the issuers of such securities. Investment by the Fund in defaulted securities poses additional risk of loss should nonpayment of principal and interest continue in respect of such securities. Even if such securities are held to maturity, recovery by the Fund of its initial investment and any anticipated income or appreciation is uncertain.

The secondary market for non-investment grade fixed income securities is concentrated in relatively few market makers and is dominated by institutional investors, including mutual funds, insurance companies and other financial institutions. Accordingly, the secondary market for such securities is not as liquid as, and is more volatile than, the secondary market for higher-rated securities. In addition, market trading volume for high yield fixed income securities is generally lower and the secondary market for such securities could shrink or disappear suddenly and without warning as a result of adverse market or economic conditions, independent of any specific adverse changes in the condition of a particular issuer. The lack of sufficient market liquidity may cause the Fund to incur losses because it will be required to effect sales at a disadvantageous time and then only at a substantial drop in price. These factors may have an adverse effect on the market price and the Fund's ability to dispose of particular portfolio investments. A less liquid secondary market also may make it more difficult for the Fund to obtain precise valuations of the high yield securities in its portfolio.

Credit ratings issued by credit rating agencies are designed to evaluate the safety of principal and interest payments of rated securities. They do not, however, evaluate the market value risk of non-investment grade securities and, therefore, may not fully reflect the true risks of an investment. In addition, credit rating agencies may or may not make timely changes in a rating to reflect changes in the economy or in the conditions of the issuer that affect the market value of the security. Consequently, credit ratings are used only as a preliminary indicator of investment quality.

Lending of Portfolio Securities. The Fund may engage in securities lending. Securities lending involves the lending of securities owned by the Fund to financial institutions such as certain broker-dealers, including, as permitted by the SEC, Goldman Sachs. The borrowers are required to secure their loans continuously with cash, cash equivalents, U.S. Government Securities or letters of credit in an amount at least equal to the market value of the securities loaned. Cash collateral may be invested by the Fund in short-term investments, including registered and unregistered investment pools managed by the Investment Adviser or its affiliates and from which the Investment Adviser or its affiliates may receive fees. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund will be responsible for any loss that might result from its investment of the borrowers' collateral. If the Investment Adviser determines to make securities loans, the value of the securities loaned may not exceed 33⅓% of the value of the total assets of the Fund (including the loan collateral). Loan collateral (including any investment of that collateral) is not subject to the percentage limitations regarding the Fund's investments described elsewhere in the Prospectus.

The Fund may lend its securities to increase its income. The Fund may, however, experience delay in the recovery of its securities or incur a loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund or its agent or becomes insolvent.

Repurchase Agreements. Repurchase agreements involve the purchase of securities subject to the seller's agreement to repurchase them at a mutually agreed upon date and price. The Fund may enter into repurchase agreements with counterparties approved by the Investment Adviser pursuant to procedures approved by the Board of Trustees that furnish collateral at least equal in value or market price to the amount of their repurchase obligation. The collateral may consist of any type of security in which the Fund is eligible to invest directly. Repurchase agreements involving obligations other than U.S. Government Securities may be subject to additional risks.

If the other party or "seller" defaults, the Fund might suffer a loss to the extent that the proceeds from the sale of the underlying securities and other collateral held by the Fund are less than the repurchase price and the Fund's costs associated with delay and enforcement of the repurchase agreement. In addition, in the event of bankruptcy of the seller, the Fund could suffer additional losses if a court determines that the Fund's interest in the collateral is not enforceable.

The Fund, together with other registered investment companies having advisory agreements with the Investment Adviser or any of its affiliates, may transfer uninvested cash balances into a single joint account, the daily aggregate balance of which will be invested in one or more repurchase agreements.

Borrowings and Reverse Repurchase Agreements. The Fund can borrow money from banks and other financial institutions, and may enter into reverse repurchase agreements in amounts not exceeding one-third of the Fund's total assets (including the amount borrowed or received).

Reverse repurchase agreements involve the sale of securities held by the Fund subject to the Fund's agreement to repurchase them at a mutually agreed upon date and price (including interest). Reverse repurchase agreements are generally considered collateralized borrowings. These transactions may be entered into as a temporary measure for emergency purposes or to meet redemption requests. Reverse repurchase agreements may also be entered into when the Investment Adviser expects that the interest income to be earned from the investment of the transaction proceeds will be greater than the related interest expense.

Reverse repurchase agreements involve the risk that the investment return earned by the Fund (from the investment of the proceeds) will be less than the interest expense of the transaction, that the market value of the securities sold by the Fund will decline below the price the Fund is obligated to pay to repurchase the securities, and that the securities may not be returned to the Fund. The Fund must identify on its books liquid assets, or engage in other appropriate measures, to "cover" open positions with respect to its transactions in reverse repurchase agreements.

Asset Segregation. As an investment company registered with the SEC, the Fund must identify on its books (often referred to as “asset segregation”) liquid assets, or engage in other SEC- or SEC staff-approved or other appropriate measures, to “cover” open positions with respect to certain kinds of derivative instruments. In the case of swaps, futures contracts, options, forward contracts and other derivative instruments that do not cash settle, for example, the Fund must identify on its books liquid assets equal to the full notional amount of the instrument while the positions are open, to the extent there is not a permissible offsetting position or a contractual “netting” agreement with respect to swaps (other than credit default swaps where the Fund is the protection seller). However, with respect to certain swaps, futures contracts, options, forward contracts and other derivative instruments that are required to cash settle, the Fund may identify liquid assets in an amount equal to the Fund’s daily marked-to-market net obligations (i.e., the Fund’s daily net liability) under the instrument, if any, rather than its full notional amount. Forwards and futures contracts that do not cash settle may be treated as cash settled for asset segregation purposes when the Fund has entered into a contractual arrangement with a third party futures commission merchant or other counterparty to off-set the Fund’s exposure under the contract and, failing that, to assign its delivery obligation under the contract to the counterparty. The Fund reserves the right to modify its asset segregation policies in the future in its discretion, consistent with the Investment Company Act and SEC or SEC staff guidance. By identifying assets equal to only its net obligations under certain instruments, the Fund will have the ability to employ leverage to a greater extent than if the Fund were required to identify assets equal to the full notional amount of the instrument.

In October 2020, the SEC adopted a final rule related to the use of derivatives, short sales, reverse repurchase agreements and certain other transactions by registered investment companies. In connection with the final rule, the SEC and its staff will rescind and withdraw applicable guidance and relief regarding asset segregation and coverage transactions reflected in the Fund’s asset segregation and cover practices discussed above. Subject to certain exceptions, and after an eighteen-month transition period, the final rule requires the Fund to trade derivatives (and other transactions that create future payment or delivery obligations) subject to a value-at-risk leverage limit and certain derivatives risk management program and reporting requirements. These requirements may limit the ability of the Fund to use derivatives, short sales, reverse repurchase agreements and similar financing transactions as part of its investment strategies and may increase the cost of the Fund’s investments and cost of doing business, which could adversely affect investors.

Appendix B

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the past five years (or less if the Fund has been in operation for less than five years). Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). Total return reflects Fund level expenses but does not reflect fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option for any contract or policy. If total return reflected all of those fees and expenses, total return would be reduced. This information has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Fund's most recent annual report (available upon request).

	Goldman Sachs Global Trends Allocation Fund				
	Institutional Shares				
	Year Ended December 31,				
	2020	2019	2018	2017	2016
Per Share Data					
Net asset value, beginning of year	\$12.32	\$11.65	\$12.46	\$11.33	\$10.89
Net investment income (loss) ^(a)	0.02	0.15	0.14	0.06	(0.03)
Net realized and unrealized gain (loss)	0.52	1.28	(0.64)	1.46	0.52
Total from investment operations	0.54	1.43	(0.50)	1.52	0.49
Distributions to shareholders from net investment income	(0.07)	(0.22)	(0.12)	(0.07)	(0.05)
Distributions to shareholders from net realized gains	(0.18)	(0.54)	(0.19)	(0.32)	—
Total distributions	(0.25)	(0.76)	(0.31)	(0.39)	(0.05)
Net asset value, end of year	\$12.61	\$12.32	\$11.65	\$12.46	\$11.33
Total return^(b)	4.35%	12.29%	(4.08)%	13.36%	4.49%
Net assets, end of year (in 000s)	\$ 289	\$ 277	\$ 247	\$ 30	\$ 27
Ratio of net expenses to average net assets	0.60%	0.59%	0.51%	0.68%	0.74%
Ratio of total expenses to average net assets	0.90%	0.89%	0.86%	0.86%	0.89%
Ratio of net investment income (loss) to average net assets	0.13%	1.18%	1.13%	0.46%	(0.25)%
Portfolio turnover rate ^(c)	168%	61%	60%	64%	260%

(a) Calculated based on the average shares outstanding methodology.

(b) Assumes investment at the net asset value at the beginning of the year, reinvestment of all distributions, a complete redemption of the investment at the net asset value at the end of the year and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares.

(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments and certain derivatives. If such transactions were included, the Fund's portfolio turnover rate may be higher.

Goldman Sachs Variable Insurance Trust – Global Trends Allocation Fund Prospectus (Institutional Shares)

FOR MORE INFORMATION

Annual/Semi-Annual Report

Additional information about the Fund's investments is available in the Fund's annual and semi-annual reports to shareholders. In the Fund's annual report you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year.

Your insurance company will provide you with annual and semi-annual reports if the Fund serves as an investment option through your variable annuity contract or variable life insurance policy.

Statement of Additional Information

Additional information about the Fund and its policies is also available in the Fund's SAI. The SAI is incorporated by reference into the Prospectus (*i.e.*, is legally considered part of the Prospectus).

The Fund's annual and semi-annual reports and the SAI are available free upon request by calling Goldman Sachs Funds at 1-800-621-2550. You can also access and download the annual and semi-annual reports and the SAI at the Fund's website: <http://www.gsamfunds.com/vitfunds>.

From time to time, certain announcements and other information regarding the Fund may be found at <http://www.gsamfunds.com/announcements-ind> for individual investors, or <http://www.gsamfunds.com/announcements> for advisers.
